The several District Officers will now prepare lists of such gentlemen who may be so presented.

6. His Highness confidently relies upon Deputy Commissioners taking the greatest care that as little inconvenience and trouble as possible is occasioned to the people during the tour. This is specially desirable in the matter of supplies. Most of the grain and supplies required for consumption in camp will be obtained at large markets, and carried with the camp for sale in a Camp Bazar, and for such supplies as must be looked for on the spot, and for the collection of which it is indispensable to obtain the aid of Government officials, ample notice will be given. All officials are strictly prohibited from supplying, as those accompanying His Highness the Maharaja are from asking for, any supplies for which the Superintendent of the Camp Bazar has not given notice, and the Dewan trusts that the Deputy Commissioners and all subordinate to them will unite in exerting themselves to ensure that no trouble is given to the people on the pretext of collecting supplies for His Highness or for any one in camp.

(1) When, under the foregoing provisions of this Act, a telegraph line or post has been placed by the telegraph authority under, over, along, across, in or upon any property, not being property vested in or under the control or management of a local authority, and any person entitled to do so desires to deal with that property in such a manner as to render it necessary or convenient that the telegraph line or post should be removed to another part thereof or to a higher or lower level or altered in form, he may require the telegraph authority to remove or alter the line or post accordingly:

Provided that, if compensation has been paid under section 10, clause (*d*), he shall, when making the requisition, tender to the telegraph authority the amount requisite to

defray the expense of the removal or alteration, or half of the amount paid as compensation, whichever may be the smaller sum.

17. (1). When, under the foregoing provisions of this Act, a telegraph line or post has been placed by the telegraph authority under, over, along, across, in or upon any property, not being property vested in or under the control or management of a local authority, and any person entitled to do so desires to deal with that property in such a manner as to render it necessary or convenient that the telegraph line or post should be removed to another part thereof or to a higher or lower level or altered in form, he may require the telegraph authority to remove or alter the line or post accordingly:

Provided that, if compensation has been paid under section 10, clause (*d*), he shall, when making the requisition, tender to the telegraph authority the amount requisite to

defray the expense of the removal or alteration, or half of the amount paid as compensation, whichever may be the smaller sum.

C. E. To those next on the list, appointments as Supervisors, Second Grade, will be offered in order of merit. The number of appointments to be so awarded will be in proportion to the requirements of the service and will be fixed by the Chief Engineer. The number so determined on will be announced annually at least six months before the final college examination. It is to be understood, however, that all vacancies in the supervisor grade will not be filled by selection from the most distinguished of the passed students of this class, as a portion of such vacancies must be reserved for the best qualified subordinates of the Overseer grade.

(2) *Engineer Subordinates.*

Vacancies in the Overseer grades of the Public Works Establishment will be filled by passed men in the order of merit. Prior to each entrance examination, notice will be given of the number of such appointments likely to become available for competition by the then entering batch of candidates.

(3) *Other Classes.*

Surveyors.

There are no permanent appointments available in the Public Works Establishment for surveyors only; but, when the services of temporary men are required for special surveys not undertaken by the Public Works subordinate staff, the officers in charge are instructed to select for such employment only passed surveyors of the Civil Engineering College.

Draughtsmen.

Certificated students of this class will be appointed to the Public Works Department as draughtsmen and estimators as vacancies occur. The course of instruction having been extended and the standard for certificate having been raised, passed students under these rules will be entitled to the improved salaries for the different classes of draughtsmen, which will be notified hereafter.

NOTE.—It is the duty of the Principal to render all reasonable assistance to passed students, who have failed to obtain a footing in the Public Works Department, in seeking employment under Local and Municipal Boards and other agencies. With this view, lists of qualified men, with remarks as to their attainments, conduct, &c., will be circulated annually to Local Fund Boards and Municipalities, with recommendations that they may be employed in suitable posts when opportunities offer.

ARTICLE XI. GENERAL.

(1) Students in the Civil and Mechanical Engineer classes are expected to appear for the B. C. E. Degree Examination, but they are discouraged from appearing until they have completed the three years' theoretical course.

(2) All students must provide themselves with the text-books in use and with the necessary apparatus, instruments (except surveying instruments), &c. They will, with the exception of military students, be non-resident. Strict observance of the standing rules of the institution as regards attendance, discipline, &c., will be expected from all.

(3) Students during their practical course shall not be under the supervision of the Principal of the College, but officers under whom they are serving will be required in the Public Works Department to furnish to the Principal half-yearly reports of their progress in such form as may from time to time be prescribed by Government.

Chief Secretary.

THE CHIEF COMMISSIONER OF COORG.

NOTIFICATION.

No. 18. *The 3rd July* 1885.

Tenders are invited for the exclusive privilege of the manufacture and wholesale vend of arrack in the Province of Coorg for 2½ years from the 1st October 1885 to the 1st of April 1888 subject to the following conditions :—

1. That the arrack shall be distilled within the Government enclosure at Fraserpet of good palm and sugar-cane jaggory : and that only such quantity of nayibela bark shall be used in its manufacture as may be necessary and as shall be fixed by the Commissioner.

2. That the price at which arrack 20° under proof shall be sold at the wholesale depôts to licensed vendors is fixed at Rs. 4—8—0 per imperial gallon of 6 quart bottles : the retail vend rate to the public being fixed at annas 1—7 per dram in towns, and annas 1—8 in villages. An allowance of 2 per cent will be granted to the contractor on account of wastage.

3. The rate of still head duty is fixed by the Officiating Chief Commissioner at Rs. 3—2—5 per imperial gallon of spirit 20° under proof. Each tenderer should specify the minimum amount per annum of revenue which he will guarantee to pay to the British Government on account of the aforesaid still head duty. In the event of a larger quantity of liquor being issued during a month than would be covered by the monthly payment of the guaranteed amount, the excise duty on each gallon so issued in excess shall also be paid by the holder of the license. In those months in which the issue may be less, the holder will be allowed the benefit of what he may have paid in excess of the monthly guaranteed amount, and a general balance will be struck at the close of each year, when the holder of the license will have to pay the duty on the number of gallons issued during the year in excess of the number of gallons the duty on which may have been covered by the minimum amount guaranteed by him to the Government.

4. The contractor will not be required to pay the cost of guards and of the ganging establishment unless the Government of India, to whom a reference on the subject has been made, desires the continuance of the existing system under which the charges in question are defrayed by the contractor. In the latter event, a refund equivalent in amount to the payments which the contractor is called upon to make will be credited to him from payments made by him from time to time into the Government Treasury.

5. The contractor shall pay Rs. 25 per mensem as rent for the use of the distillery buildings at Fraserpet, and shall be bound to take over from the out-going contractors the unexpended stock of arrack, jaggory and bark in the distillery together with the stills, casks, pots, pumps, buildings, &c., at such valuation as may be fixed by the Commissioner.

6. A deposit of Rs. 1,000 in cash or in Government securities must accompany the tender. The cover should be superscribed with the words—

"Tender for the exclusive privilege of the manufacture and wholesale vend of arrack in Coorg," and must be sent to the Commissioner of Coorg, so as to reach him on or before 12 o'clock (noon) on the 17th of August 1885, after which time no tender will be received.

7. The tenders will be opened by the Commissioner at his office at 12 o'clock (noon) on the 18th of August 1885, in the presence of the applicants who may be present. The final disposal of the tenders will, however, rest with the Officiating Chief Commissioner of Coorg, who reserves to himself full power to reject any or all of the tenders without assigning any reason. The deposits made by the applicants whose tenders are rejected will be returned to them.

8. The applicant or applicants whose tenders are selected by the Commissioner for recommendation to the Chief Commissioner, shall be required to deposit at once in cash or in Government securities, a sum equal to one-twelfth of the minimum annual revenue guaranteed by him or them, failing which the deposit made with the tender shall be forfeited.

9. The applicant whose tender is finally accepted by the Chief Commissioner shall, within eight days of the acceptance of his tender being communicated to him, deposit with the Commissioner a

further sum in cash or in Government securities, to make up with the deposits previously made, a sum equal to one-third of the yearly revenue guaranteed, and shall execute an agreement in the prescribed form on stamp paper binding himself to conform to the prescribed conditions; and if he fails or refuses to sign the agreement, or to make the deposit required, the deposits already made shall be forfeited to Government and the contract shall be otherwise disposed of.

10. The right of issuing licenses for retail shops and of reducing their number, or altering their locality is retained in the hands of the British Government. It is proposed to reduce their number to 72. A license will, however, on application, be given to the contractors for opening one retail shop at each of the towns of Mercara, Virarajendrapet, Gonikoppal and Ammatti on the conditions of their paying the ordinary license fee of Rs. 20 per mensem.

11. Intending tenderers are informed that the quantity of arrack, 20° under proof, on which still head duty was paid at Fraserpet during the last official year was 41,208 gallons.

12. Further conditions may be ascertained on application to the Commissioner of Coorg, Mercara.

By Order,

A. H. T. MARTINDALE,
Secretary.

Chapter XIII.

Insert the following as a footnote to the word "re-employment" *in the heading under this Chapter* :—

The rules in Chapter XIII of the Civil Pension Code regarding re-employment of pensioners require in certain cases deductions to be made from the pensions or salaries of re-employed officers. Instances have recently been brought to the notice of the Governor-General in Council in which such deductions were not made owing to the officers of Account having been ignorant of the fact that the re-employed officer had been granted a pension for previous service. The Governor-General in Council accordingly directs that in future when a person who was formerly in Government employ is re-employed, whether temporarily or permanently, the authority reappointing him shall specifically state in the order of reappointment whether he received any gratuity, bonus, or pension on retirement, and shall communicate a copy of this order to the Audit Office, and, if necessary, direct that the proper deductions may be made.

T. J. McGANN, F. R. C. S.,
Senior-Surgeon, Mysore.

THE CHIEF COMMISSIONER OF COORG.

NOTIFICATION.

No. 18. *The 3rd July* 1885.

Tenders are invited for the exclusive privilege of the manufacture and wholesale vend of arrack in the Province of Coorg for 2½ years from the 1st October 1885 to the 1st of April 1888 subject to the following conditions :—

1. That the arrack shall be distilled within the Government enclosure at Fraserpet of good palm and sugar-cane jaggory : and that only such quantity of nayibela bark shall be used in its manufacture as may be necessary and as shall be fixed by the Commissioner.

2. That the price at which arrack 20° under proof shall be sold at the wholesale depôts to licensed vendors is fixed at Rs. 4—8—0 per imperial gallon of 6 quart bottles : the retail vend rate to the public being fixed at annas 1—7 per dram in towns, and annas 1—8 in villages. An allowance of 2 per cent will be granted to the contractor on account of wastage.

3. The rate of still head duty is fixed by the Officiating Chief Commissioner at Rs. 3—2—5 per imperial gallon of spirit 20° under proof. Each tenderer should specify the minimum amount per annum of revenue which he will guarantee to pay to the British Government on account of the aforesaid still head duty. In the event of a larger quantity of liquor being issued during a month than would be covered by the monthly payment of the guaranteed amount, the excise duty on each gallon so issued in excess shall also be paid by the holder of the license. In those months in which the issue may be less, the holder will be allowed the benefit of what he may have paid in excess of the monthly guaranteed amount, and a general balance will be struck at the close of each year, when the holder of the license will have to pay the duty on the number of gallons issued during the year in excess of the number of gallons the duty on which may have been covered by the minimum amount guaranteed by him to the Government.

4. The contractor will not be required to pay the cost of guards and of the gauging establishment unless the Government of India, to whom a reference on the subject has been made, desires the continuance of the existing system under which the charges in question are defrayed by the contractor. In the latter event, a refund equivalent in amount to the payments which the contractor is called upon to make will be credited to him from payments made by him from time to time into the Government Treasury.

5. The contractor shall pay Rs. 25 per mensem as rent for the use of the distillery buildings at Fraserpet, and shall be bound to take over from the out-going contractors the unexpended stock of arrack, jaggory and bark in the distillery together with the stills, casks, pots, pumps, buildings, &c., at such valuation as may be fixed by the Commissioner.

6. A deposit of Rs. 1,000 in cash or in Government securities must accompany the tender. The cover should be superscribed with the words—

"Tender for the exclusive privilege of the manufacture and wholesale vend of arrack in Coorg," and must be sent to the Commissioner of Coorg, so as to reach him on or before 12 o'clock (noon) on the 17th of August 1885, after which time no tender will be received.

7. The tenders will be opened by the Commissioner at his office at 12 o'clock (noon) on the 18th of August 1885, in the presence of the applicants who may be present. The final disposal of the tenders will, however, rest with the Officiating Chief Commissioner of Coorg, who reserves to himself full power to reject any or all of the tenders without assigning any reason. The deposits made by the applicants whose tenders are rejected will be returned to them.

8. The applicant or applicants whose tenders are selected by the Commissioner for recommendation to the Chief Commissioner, shall be required to deposit at once in cash or in Government securities, a sum equal to one-twelfth of the minimum annual revenue guaranteed by him or them, failing which the deposit made with the tender shall be forfeited.

9. The applicant whose tender is finally accepted by the Chief Commissioner shall, within eight days of the acceptance of his tender being communicated to him, deposit with the Commissioner a

further sum in cash or in Government securities, to make up with the deposits previously made, a sum equal to one-third of the yearly revenue guaranteed, and shall execute an agreement in the prescribed form on stamp paper binding himself to conform to the prescribed conditions; and if he fails or refuses to sign the agreement, or to make the deposit required, the deposits already made shall be forfeited to Government and the contract shall be otherwise disposed of.

10. The right of issuing licenses for retail shops and of reducing their number, or altering their locality is retained in the hands of the British Government. It is proposed to reduce their number to 72. A license will, however, on application, be given to the contractors for opening one retail shop at each of the towns of Mercará, Virarajendrapet, Gonikoppal and Ammatti on the conditions of their paying the ordinary license fee of Rs. 20 per mensem.

11. Intending tenderers are informed that the quantity of arrack, 20° under proof, on which still head duty was paid at Fraserpet during the last official year was 41,208 gallons.

12. Further conditions may be ascertained on application to the Commissioner of Coorg, Mercara.

By Order,

A. H. T. MARTINDALE,
Secretary.

W. H. BURTON, *Colonel, R. E.,*
Executive Engineer, Presidency Division.

THE CHIEF COMMISSIONER OF COORG.

NOTIFICATION.

No. 18. *The 3rd July* 1885.

Tenders are invited for the exclusive privilege of the manufacture and wholesale vend of arrack in the Province of Coorg for 2½ years from the 1st October 1885 to the 1st of April 1888 subject to the following conditions :—

1. That the arrack shall be distilled within the Government enclosure at Fraserpet of good palm and sugar-cane jaggory : and that only such quantity of nayibela bark shall be used in its manufacture as may be necessary and as shall be fixed by the Commissioner.

2. That the price at which arrack 20° under proof shall be sold at the wholesale depôts to licensed vendors is fixed at Rs. 4—8—0 per imperial gallon of 6 quart bottles : the retail vend rate to the public being fixed at annas 1—7 per dram in towns, and annas 1—8 in villages. An allowance of 2 per cent will be granted to the contractor on account of wastage.

3. The rate of still head duty is fixed by the Officiating Chief Commissioner at Rs. 3—2—5 per imperial gallon of spirit 20° under proof. Each tenderer should specify the minimum amount per annum of revenue which he will guarantee to pay to the British Government on account of the aforesaid still head duty. In the event of a larger quantity of liquor being issued during a month than would be covered by the monthly payment of the guaranteed amount, the excise duty on each gallon so issued in excess shall also be paid by the holder of the license. In those months in which the issue may be less, the holder will be allowed the benefit of what he may have paid in excess of the monthly guaranteed amount, and a general balance will be struck at the close of each year, when the holder of the license will have to pay the duty on the number of gallons issued during the year in excess of the number of gallons the duty on which may have been covered by the minimum amount guaranteed by him to the Government.

4. The contractor will not be required to pay the cost of guards and of the gauging establishment unless the Government of India, to whom a reference on the subject has been made, desires the continuance of the existing system under which the charges in question are defrayed by the contractor. In the latter event, a refund equivalent in amount to the payments which the contractor is called upon to make will be credited to him from payments made by him from time to time into the Government Treasury.

5. The contractor shall pay Rs. 25 per mensem as rent for the use of the distillery buildings at Fraserpet, and shall be bound to take over from the out-going contractors the unexpended stock of arrack, jaggory and bark in the distillery together with the stills, casks, pots, pumps, buildings, &c., at such valuation as may be fixed by the Commissioner.

6. A deposit of Rs. 1,000 in cash or in Government securities must accompany the tender. The cover should be superscribed with the words—

"Tender for the exclusive privilege of the manufacture and wholesale vend of arrack in Coorg," and must be sent to the Commissioner of Coorg, so as to reach him on or before 12 o'clock (noon) on the 17th of August 1885, after which time no tender will be received.

7. The tenders will be opened by the Commissioner at his office at 12 o'clock (noon) on the 18th of August 1885, in the presence of the applicants who may be present. The final disposal of the tenders will, however, rest with the Officiating Chief Commissioner of Coorg, who reserves to himself full power to reject any or all of the tenders without assigning any reason. The deposits made by the applicants whose tenders are rejected will be returned to them.

8. The applicant or applicants whose tenders are selected by the Commissioner for recommendation to the Chief Commissioner, shall be required to deposit at once in cash or in Government securities, a sum equal to one-twelfth of the minimum annual revenue guaranteed by him or them, failing which the deposit made with the tender shall be forfeited.

9. The applicant whose tender is finally accepted by the Chief Commissioner shall, within eight days of the acceptance of his tender being communicated to him, deposit with the Commissioner a

further sum in cash or in Government securities, to make up with the deposits previously made, a sum equal to one-third of the yearly revenue guaranteed, and shall execute an agreement in the prescribed form on stamp paper binding himself to conform to the prescribed conditions; and if he fails or refuses to sign the agreement, or to make the deposit required, the deposits already made shall be forfeited to Government and the contract shall be otherwise disposed of.

10. The right of issuing licenses for retail shops and of reducing their number, or altering their locality is retained in the hands of the British Government. It is proposed to reduce their number to 72. A license will, however, on application, be given to the contractors for opening one retail shop at each of the towns of Mercara, Virarajendrapet, Gonikoppal and Ammatti on the conditions of their paying the ordinary license fee of Rs. 20 per mensem.

11. Intending tenderers are informed that the quantity of arrack, 20° under proof, on which still head duty was paid at Fraserpet during the last official year was 41,208 gallons.

12. Further conditions may be ascertained on application to the Commissioner of Coorg, Mercara.

By Order,

A. H. T. MARTINDALE,
Secretary.

T. J. MCGANN, F. R. C. S.,
Senior-Surgeon, Mysore Govt.

THE CHIEF COMMISSIONER OF COORG.

NOTIFICATION.

No. 18. *The 3rd July* 1885.

Tenders are invited for the exclusive privilege of the manufacture and wholesale vend of arrack in the Province of Coorg for 2½ years from the 1st October 1885 to the 1st of April 1888 subject to the following conditions :—

1. That the arrack shall be distilled within the Government enclosure at Fraserpet of good palm and sugar-cane jaggory : and that only such quantity of nayibela bark shall be used in its manufacture as may be necessary and as shall be fixed by the Commissioner.

2. That the price at which arrack 20° under proof shall be sold at the wholesale depôts to licensed vendors is fixed at Rs. 4—8—0 per imperial gallon of 6 quart bottles : the retail vend rate to the public being fixed at annas 1—7 per dram in towns, and annas 1—8 in villages. An allowance of 2 per cent will be granted to the contractor on account of wastage.

3. The rate of still head duty is fixed by the Officiating Chief Commissioner at Rs. 3—2—5 per imperial gallon of spirit 20° under proof. Each tenderer should specify the minimum amount per annum of revenue which he will guarantee to pay to the British Government on account of the aforesaid still head duty. In the event of a larger quantity of liquor being issued during a month than would be covered by the monthly payment of the guaranteed amount, the excise duty on each gallon so issued in excess shall also be paid by the holder of the license. In those months in which the issue may be less, the holder will be allowed the benefit of what he may have paid in excess of the monthly guaranteed amount, and a general balance will be struck at the close of each year, when the holder of the license will have to pay the duty on the number of gallons issued during the year in excess of the number of gallons the duty on which may have been covered by the minimum amount guaranteed by him to the Government.

4. The contractor will not be required to pay the cost of guards and of the gauging establishment unless the Government of India, to whom a reference on the subject has been made, desires the continuance of the existing system under which the charges in question are defrayed by the contractor. In the latter event, a refund equivalent in amount to the payments which the contractor is called upon to make will be credited to him from payments made by him from time to time into the Government Treasury.

5. The contractor shall pay Rs. 25 per mensem as rent for the use of the distillery buildings at Fraserpet, and shall be bound to take over from the out-going contractors the unexpended stock of arrack, jaggory and bark in the distillery together with the stills, casks, pots, pumps, buildings, &c., at such valuation as may be fixed by the Commissioner.

6. A deposit of Rs. 1,000 in cash or in Government securities must accompany the tender. The cover should be superscribed with the words—

"Tender for the exclusive privilege of the manufacture and wholesale vend of arrack in Coorg," and must be sent to the Commissioner of Coorg, so as to reach him on or before 12 o'clock (noon) on the 17th of August 1885, after which time no tender will be received.

7. The tenders will be opened by the Commissioner at his office at 12 o'clock (noon) on the 18th of August 1885, in the presence of the applicants who may be present. The final disposal of the tenders will, however, rest with the Officiating Chief Commissioner of Coorg, who reserves to himself full power to reject any or all of the tenders without assigning any reason. The deposits made by the applicants whose tenders are rejected will be returned to them.

8. The applicant or applicants whose tenders are selected by the Commissioner for recommendation to the Chief Commissioner, shall be required to deposit at once in cash or in Government securities, a sum equal to one-twelfth of the minimum annual revenue guaranteed by him or them, failing which the deposit made with the tender shall be forfeited.

9. The applicant whose tender is finally accepted by the Chief Commissioner shall, within eight days of the acceptance of his tender being communicated to him, deposit with the Commissioner a

further sum in cash or in Government securities, to make up with the deposits previously made, a sum equal to one-third of the yearly revenue guaranteed, and shall execute an agreement in the prescribed form on stamp paper binding himself to conform to the prescribed conditions; and if he fails or refuses to sign the agreement, or to make the deposit required, the deposits already made shall be forfeited to Government and the contract shall be otherwise disposed of.

10. The right of issuing licenses for retail shops and of reducing their number, or altering their locality is retained in the hands of the British Government. It is proposed to reduce their number to 72. A license will, however, on application, be given to the contractors for opening one retail shop at each of the towns of Mercara, Virarajendrapet, Gonikoppal and Ammatti on the conditions of their paying the ordinary license fee of Rs. 20 per mensem.

11. Intending tenderers are informed that the quantity of arrack, 20° under proof, on which still head duty was paid at Fraserpet during the last official year was 41,208 gallons.

12. Further conditions may be ascertained on application to the Commissioner of Coorg, Mercara.

By Order,
A. H. T. MARTINDALE,
Secretary.

II. Deferred proposition.—Report from the Municipal Commissioners Nos. 4 and 5 Divisions on the application of Ahamed Sha Sahib and 13 others to restore the well in Nabbi Sha Sahib's Makan.

Resolved.—That a grant of Rs. 200 be sanctioned towards the work from Municipal Funds subject to the following conditions :—

(1) The well to be opened for the use of the public.
(2) The Municipality to examine and pass the work after its completion.

III. Consideration of the objections raised by the Settis and Yajamans to pay the arrears of Municipal tax.

Read the following memorandum of the Vice-President, dated 29th instant, furnishing a short statement of facts, together with copies of the previous correspondence and orders of Government, on the subject of assessing the houses and shops of the Settis and Yajamans in the city :—

With reference to the petition of the Settis and Yajamans of the town, which is to be laid before the next meeting of the Board, objecting to pay to the Municipality the assessment charged on their houses and shops, I consider it necessary to give here a short statement of facts and to annex copies of the previous correspondence and orders of Government bearing on the subject for the information of the Municipal Commissioners.

The city comprises 54 Pettahs or wards for each of which there are Settis and Yajamans who are headmen of their respective castes and whose offices are of hereditary character. These men by virtue of their office preside at the caste or religious ceremonies and decide caste disputes that may arise among the members of their communities. The old regime of the country having had regard apparently for their offices appeared to have exempted them from payment of house and shop taxes payable to Government, which privilege they enjoyed till the year 1867.

The Municipal Commissioners of the Town at their meeting held on the 18th July 1867 had before them for the first time the question why Settis and Yajamans and several other classes such as Brahmans, Musalmans, Native Christians, &c., should not contribute towards the Municipal Fund in common with others and resolved that the Amildar of Bangalore should be directed to prepare a list of buildings that belonged to the hitherto privileged classes in view to charge assessment. At a subsequent meeting of the Municipal Board held in November 1867, a sub-committee consisting of certain Municipal Commissioners was appointed to revise the list prepared by the Amildar and it was accordingly done.

In the meanwhile the Settis and Yajamans pressed their claim for the continuance of the privilege which they enjoyed for a long time. Then the following orders were received from Government:—

From the Secretary to the Commissioner of Mysore, To the Superintendent, Nundydroog Division, Letter No 1413—25, dated 10th June 1868.

I am directed by the Commissioner to observe that the sub-committee to whom the question was referred have no doubt carefully considered it, but it appears to Mr. Bowring that although Government as such may wisely have exempted certain classes from an obligation to pay house tax to the Sarkar as a source of revenue due to itself, yet it is obvious that such exemption does not extend to contributions on the part of the inhabitants to a local fund solely applied to the improvement of the Pettah and from which the Government derive no pecuniary advantage.

From the Superintendent, Nundydroog Division, To the Deputy Superintendent Bangalore District, Official Memorandum No. 1031—243, dated 12th June 1868.

In forwarding a copy of the foregoing to the Deputy Superintendent of the Bangalore District, states that with reference to the expression of opinion therein conveyed it seems advisable that he should assemble the Yajamans, Settis, &c., and in presence of the Board explain to them that the Commissioner is of opinion that they ought to pay as well as others, as the proceeds are required exclusively for improving the town and not for Government purposes.

From the Secretary to the Commissioner of Mysore, To the Superintendent, Nundydroog Division, Letter No. 4086—90, dated 12th October 1868.

In acknowledging the receipt of your letter No. 2714—82 of the 5th instant and its enclosures, I am directed to observe that it is doubtful whether the list of persons exempted from municipal cess is complete as only Settis and Yajamans are mentioned in it, whereas there is reason to believe that many officials and others do not pay municipal taxation. No one is exempt from municipal taxation in the Cantonment from the Commissioner downwards, and Mr. Bowring does not see why any one should be exempt in the Pettah.

From the Superintendent, Nundydroog Division, To the Secretary to the Commissioner of Mysore, Letter No. 3084—88, dated 28th October 1868.

In reply to your letter No. 4086—90 of the 12th October 1868, I have the honor to state for the Commissioner's information that under the existing rules no one will be exempt from the payment of the municipal house tax cess.

2. As already explained, only the Settis and Yajamans claim exemption from mohatarfa taxation to which they are now subjected under the operation of the Municipal Rules.

From the Secretary to the Commissioner of Mysore, To the Superintendent, Nundydroog Division, Letter No. 4413—78, dated 31st October 1868.

I have the honor, by desire of the Commissioner, to acknowledge the receipt of your letter No. 3084—88 of the 20th October 1868 and to request that care may be taken to impress upon such persons as were previously exempted from payment of mohatarfa, that municipal taxation in no way benefits the revenue of Government which has relinquished the above cess, and that all are alike liable to contribute towards Municipal Funds which are expended solely on the watch and ward of the town and its conservancy.

Since the receipt of the above orders the Settis and Yajamans have uninterruptedly paid to the Municipality the assessment charged on their houses and shops up to the year 1880—81.

In 1881—82 a general revision of mohatarfa and house assessment was effected under orders of the late Chief Commissioner, dated 27th September 1879. It may be noted here that even in these Proceedings it was distinctly ruled that "no exemption on account of caste or other grounds shall be allowed."

Under the said revision the house assessment was fixed with reference to the annual rental value of the premises as provided in the Municipal Regulations and the mohatarfa or shop tax according to the extent or value of the business carried on as per Revenue Rules. In so doing, there was an increase to the old rate in certain cases.

Some of the leading Settis and Yajamans have not only protested against the payment of the taxes at the enhanced rates but also objected to pay at the old rate which they have continued to pay since its imposition or for a period of upwards of 12 years past. Then the Municipality issued processes for the recovery of the arrears when these men have come forward with a petition requesting postponement of execution of distraint warrants pending disposal of their appeal to the Dewan and to prove the fact of the presentation of their appeal to Government they produced a copy of their appeal petition and the concluding part of which runs thus :—

"We humbly beg leave therefore to request that your honor (Dewan) will be pleased to issue orders at once to the Municipal President directing him not to levy the enhanced amount of tax from us."

This matter was again brought before the Municipal Commissioners at their meeting held on the 31st January 1885 and the following resolution was then recorded :—

Resolution.—The Commissioners are of opinion that no exemption can be allowed as prayed for by the petitioners and they are required to pay up the arrears at the old rate. In the matter of the revised rates the Government be addressed for orders and till such time as the necessary orders are received, the collection of the difference be deferred.

The purport of this resolution was duly communicated to the petitioners by means of endorsements and required to pay up the arrears at the old rate.. Even to this they have not responded.

Resolution.—The Board consider that the objections raised by the petitioners to pay municipal assessment are untenable and that they be required to pay up the arrears without further delay and that their prayer for exemption from municipal taxation cannot be granted.

IV. Proposed enforcement of the provisions of Bye-law No. 22 and Municipal Regulations regarding cess-pits in the dwelling houses and the entertainment of additional temporary establishment for the purpose.

Read also the following notice prepared by the Vice-President in connection therewith for publication in the Town :—

The existence of deep cess-pits in many dwelling houses in the Town and large accumulations therein of excretal matter are highly objectionable not only in a sanitary but also domestic point of view. They pollute the water in the wells, render the air the people breathe dangerously impure, and are a fertile source of disease and death. The repeated attempts of the Municipality to enforce a daily conservancy system have often met with opposition from the residents of the Town, because it was an innovation and contrary to "mámúl," but it is not denied as a fact that the presence of large accumulations of filth and fecal matter produce very offensive odours especially in the rainy season. This I have often noticed during my inspection of houses, and pointed out the evil to the occupants then and there.

2. To remedy this state of things and to meet the requirements of decency and health, there is no other course open than to enforce the provisions of Section 108 of the Municipal Regulations which prescribe a certain penalty for every owner or occupier of a house allowing for more than 24 hours any dirt, dung, nightsoil or any offensive matter to remain on his premises. The Bye-law No. 22 will be enforced as regards such previes as from their situation afford no facilities for their daily clearance by Municipal or private scavengers.

248

3. For the purpose of carrying out the said provisions of the law, two Special Overseers have been appointed whose sole duty will be to inspect every cess-pit in the Town, and advise the house owners or occupiers to duly conserve them and in case of neglect to take action authorized by law.

4. The head of each family is therefore earnestly requested to co-operate with the Overseers in carrying out the said necessary improvements and to offer no opposition to their entering the houses or back-yards for the purposes of the said inspection. It may here be noted for the information of the public that Municipal Commissioners and their officers have authority under the Municipal Regulations to enter into and inspect any building or land within their limits and cleanse them for sanitary reasons.

Resolution.—The Commissioners approve of the proposed arrangement regarding the conservancy of cess-pits in the City and sanction the entertainment of the following establishment as a tentative measure for a period of six months :—

	Rs.
2 Nuisance Overseers at Rs. 10 per mensem	120
2 Carts at Rs. 10 per mensem	120
2 Peons at Rs. 5 per mensem	60
Total....	300

This charge to be met from Reserve Fund provided for in the budget.

Resolved.—That the following regulation now in force in Bangalore, regarding the levy of taxes on unoccupied buildings, be introduced into this Town.

"When any house shall have been vacant for 60 consecutive days during any year, the President of the Municipal Commission shall remit so much, not exceeding one-half of the rate of that year, as may be proportionate to the number of days the said house may have remained unoccupied: provided that the owner of such house, or his agent, shall have given to the President notice in writing of the vacancy thereof, and that the amount of rate to be remitted shall be calculated from the date of the delivery of such notice."

13. *Resolved.*—That the Amildar of Mysore be asked to favor the Municipality with a copy of a ryot's patta and a draft form of patta or receipt, for adoption in this Municipality, after approval by the Board.

14. *Resolved.*—That with a view to save unnecessary complaints, all parties who may have to appeal against taxation or who may wish to have the former rates altered on altered circumstances, or who may ask for remission, should present their petitions to the Vice-President during the month of September every year, and that no application received afterwards will be attended to during that year's settlement.

16. *Read letter from the Principal of His Highness the Maharaja's College furnishing extract of the Dewan's orders directing the diversion of Municipal drain from the College compound.*

Resolved.—That, as recommended by the Sanitary Engineer, pipe-drain be laid through the College compound for the carrying away of soiled water from Halladakeri to the main drain in order to remove the stink for the present.

17. *Resolved.*—That Brahmin, Jain, Sivachar and Komati caste people may take water from the two detached cisterns built in the premises of Rangacharlu's Memorial Hall, as they were doing in Kuppanna garden cisterns.

1. *Monthly Accounts.*

The accounts for the month of April 1885 have been examined and passed with the remark that the Police Assistant Commissioner be asked to state the nature of the duty on which the Head Inspector went to Bangalore during April 1885 and drew batta and whether it was necessary for him to go there.

2. *Municipal Budget for* 1885—86 *as revised by the Sub-Committee.*

Resolved.—That a Canarese translation of the budget be prepared and circulated to the Commissioners and the budget laid before the Board on Tuesday next, the 16th instant, at 7½ o'clock in the morning.

3. *Proceedings of the Dewan No.* 1167, *dated* 13*th May* 1885, *exempting Messrs. Wallace and Appavu Chetti from payment of octroi duty on timber supplied to them by the Government.*

To be recorded.

4. *Letter from Municipal Vice-President, Bangalore, No.* 106, *dated* 16*th May* 1885, *stating that the practice obtaining in Bangalore is to record only the resolutions of the Board and not the whole discussions.*

To be deferred till receipt of the orders of the Dewan on the subject.

5. *Docket No.* 169, *dated* 28*th instant, from the Sanitary Engineer, recommending that the pay of Overseer Mahalingachari be increased from Rs.* 35 *to* 40 *per month.*

Resolved.—That a personal allowance of Rs. 5 per month be given to Overseer Mahalingachari till such time as he may be employed under Mr. Standish Lee.

6. *Letter from Manager, Mysore State Railway, No.* 1291—232, *dated* 29*th April, requesting to be put in possession of the land lately vacated by the oil-mongers as ordered by Dewan.*

Resolved.—That inasmuch as the Board has now paid a moiety of the compensation to the oil-mongers and because the land on which their houses stood originally belonged to the Municipality, in the humble opinion of the Board, the Railway authorities have no better claim to the land in question than the Municipality. The Government may therefore be moved to reconsider the order passed with regard to the land.

7. *Petition from Ganigar Papa requesting that he may be paid compensation for the well constructed by him when the oil-mongers lived near Rajput Ghat.*

Resolved.—That wells having been built at the cost of the Municipality in the locality where the oil-mongers are now located, no compensation can be allowed to the petitioner Ganigar Papa for the well even if it was built at his own cost, which allegation has been denied by others.

8. *Application from the Joint-Secretaries, Rangacharlu's Memorial Fund, requesting that a suitable sum may be contributed by the Municipality towards completing the Memorial Hall.*

Resolved.—That the Committee of Rangacharlu's Memorial Fund be asked to state whether they would be willing to make over charge of the Memorial Hall building and its management to the Municipality were it to contribute funds to complete the building.

9. *Regarding the conservancy of the places where cows are picketted within Municipal limits.*
10. *Regarding plans to accompany the applications for building houses in main and other streets.*

These proposals be deferred for discussion to a future date in anticipation of a Municipal regulation giving legal status to the Board.

11. *Sayer Daroga's report regarding the levy of octroi duty on timber imported from Hunsur with Mafi Rahadari.*

Resolved.—That the weight of a cart-load of timber for the purpose of levying octroi duty be fixed at 25 cubic feet, as was already decided by the Forest Department and acted upon, and that the Hunsur Municipality be asked to insert the quantity in cubic feet in their Mafi Rahadaris, instead of simply stating in them the number of cart-loads for information.

12. *Resolved.*—That a decent pendal be erected about Mr. Báleraj Ars' house in front of the Palace Treasury and that the Town be illuminated on the night of the 23rd June 1885, the Birthday of His Highness the Young Prince and Heir Apparent to the Mysore Throne.

Resolved.—That the instructions contained in the late Chief Commissioner's Proceedings regarding the taxation of weavers not having been followed in this Town, a Committee consisting of Messrs. Nazar-alli Bég, Ananda Rao and Puttanna; arrange among themselves to meet to investigate and report as to what each weaver was and is paying for loom tax and what amount he has now been taxed on account of his house in addition, with their recommendation to be brought forward for consideration at the next meeting.

10. *Petition from butchers objecting to pay mohatarfa tax on shops.*

Resolved.—That no exemption of general trade tax can be made in favor of mutton butchers, but as the rate of rent they now pay to the Municipality for stalls is high, it is reduced from Rs. 1—12—0 to Rs. 1—8—0 per month from 1st September 1885, the rent which the Bangalore Town Municipality is recovering being only one rupee a month.

11. *Approval of the plan of frontage of houses to be built and fixing of prices for building sites about Jagan Mohan Palace.*

This subject to lie over for the next meeting.

12. *Valuation of houses proposed to be removed from the fort on sanitary grounds.*

Resolved.—That Messrs. Annaiya Pandit, Lakshminaranappa and Virasangappa do arrange among themselves to meet to settle the valuation of the houses proposed to be removed from the fort on sanitary grounds and to submit the estimate before the meeting of the Board takes place next month.

13. *Cost incurred by the Executive in helping poor and indigent house owners for putting up the frontages, &c., in Doddapettah amounting to Rs.* 1,562—14—0.

The improvements having been effected along with, and in continuation of the fort improvements, the amount which may become irrecoverable should be met from the same funds, as it does not concern the Board, inasmuch as it was never formally brought before it.

Messrs. Virasangappa, Lakshminaranappa and Nazaralli Bég for, and Messrs. Ananda Rao, Shek Ibrahim and Ibbu Sait against, payment of the money from the Municipal funds. Mr. Puttanna neutral and Dr. Benson was absent. As the Executive had spent the money, they did not wish to give their votes.

II. Docket No. 930, dated 19th August 1885, from the Deputy Commissioner, Bangalore District, enclosing copy of letter No. 820 of 30th July 1885, to the address of the Secretary, Public Works Department, together with its enclosure regarding water-supply to the Town from the new reservoir on Tumkur road.

Resolution.—Read the above correspondence between the Deputy Commissioner, Bangalore District, and the Secretary, Public Works Department, Mysore Government, together with an extract from his Administration Report for the year 1884—85.

The Municipal Commissioners Nos. III and IV Divisions, represent that almost all the wells in their Divisions, both public and private, dry up during the hot season, and the Dharmambudhi tank likewise becomes dry, and in consequence, people greatly suffer from want of water. The Commissioners are unanimously of opinion that early measures should be taken to secure additional supply of water to the Town, and therefore resolve that a respectful representation be made to Government that the Board will gladly undertake as far as their funds will admit, the distribution arrangements most suitable to the special wants of the community, if the Government will be pleased to bring the water to a central and commanding position in the City from the new reservoir on the Tumkur road, which the Board understand the Government is contemplating to do, besides supplementing the Dharmambudhi tank. If the above work be carried out, it will be in the opinion of the Commissioners, a lasting boon on the City.

III. Letter dated 26th August 1885, from the Lady Superior, Convent of the Good Shepherd, Bangalore, applying for the monthly grant of Rs. 200 towards St. Martha's Hospital in arrears, *viz.* from April 1885.

Resolution.—The Board observe that according to the understanding originally arrived at, the Mission Hospital was to get the monthly grant of Rs. 200 towards the institution, only from the date

the Hospital is opened to the public and not before. The Board now learn that the Hospital will not be ready for another month or two to receive patients. However, having regard to the fact that a large expenditure has to be incurred by the Catholic Mission to furnish the new Hospital, the Commissioners resolve to sanction the payment of a sum of Rs. 1,200 from the Municipal Funds, subject to the approval of Government, as a furniture grant. They further resolve that it may be intimated to the Lady Superior that regular monthly payment of Rs. 200 will be commenced only after the Hospital is open to the public.

IV. Docket No. R 981, dated 31st August 1885, from the Deputy Commissioner, Bangalore District, enclosing copy of docket No. 3071—174 of 27th idem, from the Secretary to the Government of Mysore, sanctioning the transfer to the City Municipality of the management of the Bangalore Government Chuttrum from 1st September 1885.

Resolution.—The Board willingly accept to undertake the management of the chuttrum in question.

V. Proceedings of the Dewan of Mysore, Camp No. 881, dated Mysore, 11th September 1885, regarding the management of the cattle-pound in the Bangalore City Municipality.

Resolution.—To be recorded.

VI. Proceedings of the Dewan of Mysore, Camp No. 906—8, dated Mysore, 14th September 1885, sanctioning allowance to Honorary Assistant Surgeon S. Arokeum Pille, and directing the charges to be met from Municipal Funds of this City.

Resolution.—The Board observe that the original allotment sanctioned by Government payable from Municipal Funds in their Proceedings No. 919-22—67, dated 26th May 1883, on account of the maintenance of the Maternity has been far exceeded as will be seen from letter No. 221, dated 18th July last, from the Vice-President to the address of Government, and that the funds of this Municipality will necessarily be crippled, should any further charges be directed to be met from the above funds. The Board therefore resolve that Government be respectfully requested to reconsider the matter and order the salary of the Honorary Assistant Surgeon Mr. Arokeum Pille to be disbursed from Provincial Funds. In the meantime the Board sanctions the disbursement of Rs. 793—8—9 being the arrears of Mr. Arokeum Pille's allowance from the Municipal Funds as directed by the Government.

VII. Deferred proposition of the last meeting- as regards the proposals by Dr. McGann, Senior Surgeon to the Mysore Government, of alloting the strip of land running from London Mission Institution to the Cenotaph for building purposes.

Resolution.—The majority of the Commissioners consider it undesirable to allow the site to be built upon. They at the same time desire that as resolved in a previous meeting, new road ways be made on the site connecting the several cross roads in Cubbon Pettah with the District office road. The Vice-President in consultation with Mr. Cameron, the Municipal Commissioner of No. VI Division, is to decide the number of such roads and to effect such other improvements as will give Cubbon Pettah a decent appearance.

A. SRINIVASACHARLU,
Vice-President.

68. On the death of a registered occupant, the Deputy Commissioner shall cause the name of his eldest son or other person appearing to be his heir or the principal of his heirs, to be registered in his stead, and the said heir shall thereafter be deemed the registered occupant, and, subject to the provisions of the last preceding section, shall be dealt with accordingly.

When entry to be amended.

69. If at any time any person shall, by production of a certificate of heirship, or of a decree or order of a competent court, satisfy the Deputy Commissioner that he is entitled to be the registered occupant in preference to the person whose name the Deputy Commissioner has ordered to be registered under Section 68, the Deputy Commissioner shall cause the entry in the Government records to be amended accordingly.

Section 72, B. R. C.

Intestate occupancy or holding to be sold.

70. If an occupant dies intestate and without known heirs, the Deputy Commissioner shall dispose of his occupancy by sale, subject to the provisions of this Regulation, or of any other law at the time in force for the sale of forfeited occupancies, in realization of the land revenue, and the law at the time in force concerning property left by a person dying intestate and without known heirs shall not be deemed to apply to the said occupancy, but only to the proceeds of such sale after deducting all arrears of land revenue due by the deceased to Government and all expenses of the sale.

Right of occupancy to be transferable and heritable.

71. The right of occupancy shall be deemed an heritable and transferable property subject to the provisions contained in Section 54, or otherwise prescribed by law, and shall immediately pass to the person whose agreement to become an occupant shall have been accepted by the Deputy Commissioner.

Relinquishment of Occupancy.

Section 74, B. R., C.

72. An occupant may, by giving written notice to the Amildar or Deputy Amildar, relinquish his occupancy, either absolutely or in favor of a specified person : Provided that such relinquishment apply to the entire occupancy or to whole survey numbers, or recognized shares of survey numbers. An occupancy absolutely relinquished shall be deemed to be a forfeited occupancy and may be sold or otherwise disposed of in the manner prescribed in Sections 54 and 55. An absolute relinquishment shall be deemed to have effect from the close of the current revenue year, and notice thereof must be given before the 31st March in such year, or before such other date as may be, from time to time, prescribed in this behalf for each District by the Government. A relinquishment in favor of a specified person may be made at any time.

Occupant may relinquish his occupancy.

When there are more occupants than one, the notice of relinquishment must be given by the registered occupant ; and the person, if any, in whose favor an occupancy is relinquished, or, if such occupancy is relinquished in favor of more persons than one, the principal of such persons must enter into a written agreement to become the registered occupant, and his name shall thereupon be substituted in the records for that of the previous registered occupant.

Section 75, B. R. C.

73. When a lump assessment is fixed upon several fields or survey numbers in the aggregate, it shall not be lawful for the occupant to relinquish as aforesaid any one or more of such fields or survey numbers except with the previous consent of the Deputy Commissioner. It shall be competent to the Deputy Commissioner to grant or refuse his consent ; if he grants it, the occupancy shall be divided, and the Deputy Commissioner shall determine the proportional amount of land revenue to be paid by each portion of it, and the original occupant and the person, if any, in whose favor he relinquishes a portion of his occupancy, shall be held liable for the revenue severally assessed on their portions.

Relinquishment of lands paying a lump assessment.

Section 76, B. R. C.

74. The provisions of the last two Sections shall apply, as far as may be, to the holders of alienated land : Provided that

Relinquishment of land described in Para 1 of Section 49.

(*a*) it shall not be lawful to relinquish as aforesaid any portion of any land held wholly or partially exempt under the circumstances described in the first paragraph of Section 49 until the commuted assessment, payable in respect of such portion of land, has been determined under the provisions of the said Section ; and that

(*b*) if any person relinquish land on which, under the circumstances described in Section 49, a larger revenue is levied than would ordinarily be leviable on such land, he shall be

(*b*) the validity of the terms or conditions of any lease or other express instrument under which land is, or may hereafter be, held from Government.

Section 79, B. R. C.

77. The registered occupant shall continue liable for the land revenue due on the occupancy and for all other lawful demands of Government in respect of the same, until such time as the occupancy is relinquished or transferred, under any of the provisions of this Regulation, to the name of any other person; and the Deputy Commissioner shall not be bound in any case to recognize any person to whom any interest in any portion of an occupancy has been assigned, unless the transfer has been recorded in the revenue records in accordance with the foregoing provisions.

Occupant or holder to continue liable for all demands until the occupancy or holding is duly relinquished or transferred.

Remedies against Forfeiture of Occupancies.

Section 80, B. R. C.

78. In order to prevent the forfeiture of an occupancy under the provisions of Section 54 or of any other law for the time being in force, through non-payment by the registered occupant of the land revenue due on account thereof, it shall be lawful for any co-occupant, tenant, mortgagee, or other person interested in the continuance of the occupancy, to pay, on behalf of such registered occupant, all sums due on account of land revenue, and for the Deputy Commissioner to receive the same. And in any such case, the Deputy Commissioner may give to the person who has paid the land revenue, as aforesaid such aid for the recovery of the proportional amounts which he may consider to be properly payable by other persons in occupation of parts of a field or survey number, as he might legally have given had the persons so paying been the registered occupants.

To prevent forfeiture of occupancy, certain persons other than the registered occupant may pay the land revenue.

Deputy Commissioner may assist such persons in recovering the revenue from other parties liable therefor.

Section 81, B. R. C.

79. If it shall appear to the Deputy Commissioner that a registered occupant has failed to pay land revenue and has thus incurred forfeiture with a view to injure or defraud his co-occupants, or other persons interested in the continuance of the occupancy, or that a sale of the occupancy will operate unfairly to the prejudice of such co-occupants or other persons, it shall be lawful for him, instead of selling the occupancy, to forfeit only the said registered occupant's interest in the same and to substitute the name of any such co-occupant or other person as registered occupant thereof in the revenue records, on his payment of all sums due on account of land revenue for the occupancy, and such person so becoming the registered occupant shall have the rights and remedies with respect to all other persons in occupation provided for by Section 99.

Deputy Commissioner may in certain cases, make co-occupant or other person the registered occupant instead of selling occupancy for realization of land revenue.

80. The provisions of the last two preceding Sections shall apply to alienated holdings *mutatis mutandis*, but nothing authorized or done under the provisions of the aforesaid Sections shall affect the rights of the parties interested as the same may be established in any suit between such parties in a Court of competent jurisdiction.

Provisions of Sections 78 and 79 apply to alienated holdings.

Annual tenancy terminates on 31st March.

Three months' notice to be given by land-lord and tenant for termination of tenancy.

An annual tenancy shall require for its termination a notice given in writing by the land-lord to the tenant or by the tenant to the land-lord at least three months before the end of the year of tenancy, at the end of which it is intimated that the tenancy is to cease. Such notice may be in the form of Schedule **E** or to the like effect.

222. Nothing in this Chapter shall affect any of the provisions of Act XXIII of 1871 (The Pensions Act).

Section 4, B. R. J. Act.

Bar of certain suits,

223. Subject to the exceptions hereinafter appearing, and except as hereinbefore expressly provided, no Civil Court shall exercise jurisdiction as to any of the following matters:—

(*a*) Claims against Government relating to any property appertaining to the office of any hereditary officer appointed or recognized by Government or of any other village officer or servant; or

claims to perform the duties of any such officer or servant, or in respect of any injury caused by exclusion from such office or service; or

suits to set aside or avoid any order relating to such office or service or such officer or servant, which may be passed by Government, or any officer duly authorized in that behalf; or

claims against Government relating to lands declared by Government, or any officer duly authorized in that behalf to be held for any service whatsoever;

(*b*) Objections—

to the amount or incidence of any assessment of land revenue authorized by Government, or to the mode of assessment, or to the principle on which such assessment is fixed; or

to the validity or effect of the notification of survey or settlement, or of any notification determining the period of settlement;

(*c*) Claims connected with or arising out of any proceedings for the realization of land revenue, or the rendering of assistance by Government, or any officer duly authorized in that behalf, to superior holders for the recovery of their dues from inferior holders; or

(*d*) Claims against Government—

(*i*) any written grant from the Governmont expressly creating or confirming such exemption ;

Such claim shall be cognizable in the civil courts.

Illustrations to (*h*).

(1) It is enacted that when a specific limit to assessment has been established and preserved, the assessment shall not exceed such specific limit. A is the owner of land worth Rs. 100 for assessment. He claims to be assessed at Rs. 50 only on the strength of a course of dealing with him and his predecessors under which his land has not been more highly assessed. There is no exemption not before existing created by enactment, and A's claim is not cognizable in a Civil Court.

(2) It is enacted that land revenue shall not be leviable from any land held and entered in the land register as exempt. A claims to hold certain land as exemption the ground that it has been so held by him and is so entered in the land register. This is an exemption expressly confirmed by enactment on the ground of its being shown in a public record, and A's claim is cognizable in a Civil Court.

(3) It is enacted that the Deputy Commissioner shall confirm existing exemptions of all lands shown in certain maps to be exempt. A claims exemption alleging that his land is shown in the maps to be exempt. A's claim is cognizable in a Civil Court.

(4) It is enacted that assessment shall be fixed with reference to certain considerations and not with reference to others. This is not an enactment creating an exemption in favor of any individual or class and no objection to an assessment under such an enactment is cognizable in a Civil Court.

(5) It is enacted that, in the event of the proprietary right in lands, the property of Government, being transferred to individuals, they shall be permitted to hold the lands for ever at the assessment at which they are transferred. The proprietary right in certain lands is transferred to A at an assessment of Rs. 100. An exemption from higher assessment not before existing is expressly created in favor of A by enactment, and he may seek relief in the Civil Court against over-assessment.

Section 5, B. R. J. Act.

Saving of certain suits.

224. Nothing in the preceding Section shall be held to prevent the Civil Courts from entertaining the following suits :—

(*a*) suits against Government to contest the amount claimed or paid under protest, or recovered as land revenue, on the ground that such amount is in excess of the amount authorized in that behalf by Government, or that such amount had, previous to such claim, payment, or recovery, been satisfied, in whole or in part, or that the plaintiff, or the person whom he represents, is not the person liable for such amount ;

(*b*) suits between private parties for the purpose of establishing any private right although it may be affected by any entry in any record of a Revenue survey or settlement, or in any village papers ;

(*c*) suits between superior holders and inferior holders relating to matters not otherwise expressly provided for by this Regulation ;

and nothing in Clause (*g*) of the preceding Section shall be held to prevent the Civil Courts from entertaining suits, other than suits against Government, for possession of any land being a whole survey number or a recognized share of a survey number.

Section 7, B. R. J. Act.

Punishment or prosecution of Revenue officers, no bar to civil remedies.

226. Nothing in any law for the time being in force which authorizes the punishment departmentally of any Revenue officer for any offence or breach of duty or which sanctions his prosecution criminally for such offence or breach, shall be held to bar any remedy which may be had in the Civil Court against such officer.

Section 11, B. R. J. Act.

Suits not to be entertained unless plaintiff has exhausted right of appeal.

227. No Civil Court shall entertain any suit against Government on account of any act or omission of any Revenue officer, unless the plaintiff first proves that previously to bringing his suit, he has presented all such appeals allowed by the law for the time being in force, as, within the period of limitation allowed for bringing such suit, it was possible to present.

The Chief Court, when it has heard and considered the case shall send a copy of its decision, with the reasons therefor, under the seal of the Court, to the Government by which the reference was made, and the case shall be disposed of conformably to such decision.

If the Chief Court considers that any such statement is imperfectly framed, the Chief Court may return it for amendment.

The costs (if any) consequent on any such reference shall be dealt with as the Chief Court in each case directs.

Section 13, B. R. J. Act.

Power of Civil Judge to refer questions of jurisdiction to Chief Court.

229. If, in any suit instituted, or in any appeal presented, in a Civil Court, the Judge doubts whether he is precluded by this Chapter from taking cognizance of the suit or appeal he may refer the matter to the Chief Court.

The Chief Court may order the Judge making the reference either to proceed with the case or to return the plaint.

The order of the Chief Court on any such reference shall be final.

The privilege conferred on the Government by this Section shall *mutatis mutandis* apply to any appeal or second appeal against any decree in any such suit as is described in this Section.

It shall be lawful for the Deputy Commissioner to clear such land by the removal of any buildings or other obstruction, in the event of the person in occupation thereof, or other person interested, after written notice of not less than one month shall have been served upon him, failing to do so himself.

38. Unless it is otherwise expressly provided by the terms of any grant made, or of any other instrument of transfer executed, by the Government for the time being, the right to all precious metals, precious stones, coal and other minerals to be extracted by any process of mining from any lands whatsoever, shall vest absolutely in the Government, and the Government shall have all the powers necessary for the proper enjoyment or disposal of such rights.

Provided that

(1) Nothing in this Section shall be deemed to apply to limestone, granite and such other ordinary minerals as the Government, by Notification in the official Gazette, may, from time to time, exempt from the scope of this Section;

(2) If for the purpose of exercising any of the rights referred to in this Section either by the Government or by any person acquiring such rights from the Government, any land in the holding or enjoyment of others is required, such land may be acquired in accordance with the Land Acquisition Act X of 1870; and whenever in the exercise of the rights aforesaid, any damage be caused to any holder of land by the disturbance of the surface of such land, and such holder and the Government be unable to agree as to the amount of compensation to be paid to such holder for such damage, the same shall be determined in accordance with the procedure prescribed by the Land Acquisition Act X of 1870.

The Deputy Commissioner's decision as to the said right of grazing shall be final.

Section 40, B. R. C.

Right to trees in unalienated land.

41. In villages or portions of villages of which the original survey settlement has been completed before the passing of this Regulation, the right of Government to all trees in unalienated land, except trees reserved by Government, or by any Survey officer, whether by express order made at or about the time of such settlement, or under any rule, or general order in force at the time of such settlement, or by notification made and published at or any time after such settlement, shall be deemed to have been conceded to the occupant.

In the case of villages or portions of villages of which the original survey settlement shall be completed after the passing of this Regulation, the right of Government to all trees in unalienated

land shall be deemed to be conceded to the occupant of such land except in so far as any such rights may be reserved by Government, or by any Survey officer on behalf of Government, either expressly at or about the time of such settlement, or generally by notification made and published at any time previous to the completion of the survey settlement of such village or portion of a village.

When permission to occupy land has been, or shall hereafter be, granted after the completion of the survey settlement of the village, or portion of a village in which such land is situate, the said permission shall be deemed to include the concession of the right of Government to all trees growing on that land which may not have been, or which shall not hereafter be, expressly reserved at the time of granting such permission, or which may not have been reserved under any of the foregoing provisions of this section, at or about the time of the original survey settlement of the said village or portion of a village.

Section 42, B. R. C.

43. All road-side trees which have been planted and reared by or under the orders of, or at the expense of, Government, or at the expense of Local Funds, vest in Government. But in the event of such trees dying, or being blown down, or being cut down by order of the Deputy Commissioner, the timber shall become the property of the holder of the land in which they were growing; and the usufruct, including the loppings of such trees, shall also vest in the said holder. Provided that the trees shall not be lopped except under the orders of the Deputy Commissioner.

If the holder of any land in which such trees are growing shall so desire and shall make an application to the Deputy Commissioner for the purpose at any time within two years from the date on which this Regulation shall come into operation, the Deputy Commissioner shall deduct the strip of land covered by the said trees from his holding and remit thenceforward the proportionate amount of land revenue due upon the strip so deducted. Any strip of land so deducted shall, with the trees upon it, vest thereafter in Government.

Provided that no person shall be punished twice for the same offence.

The decision as to the value of such tree or portion thereof or other natural product or as to the fine under this Section shall be passed by the Deputy Commissioner after a summary enquiry, and such decision shall be final.

All alluvial lands, newly formed islands or abandoned river-beds, which vest, under any law for the time being in force, in any holder of alienated land, shall be subject, in respect of liability to the payment of land revenue, to the same privileges, conditions or restrictions as are applicable to the original holding, in virtue of which such lands, islands or river-beds so vest in the said holder: but no revenue shall be leviable in respect of any such lands, islands or river-beds, until or unless the area of the same exceeds half an acre and also exceeds one-tenth of the area of the said original holding.

Section 47, B. R. C.

Assessment of land revenue in cases of diluvion.

47. Every holder of land paying revenue in respect thereof shall be entitled, subject to such rules as may be, from time to time, made in this behalf by the Government, to a decrease of assessment if any portion thereof, not being less than half an acre in extent, nor less than one-tenth of the holding, is lost by diluvion.

And the assessment fixed under the provisions of this Regulation upon any land appropriated for any one of the above purposes shall be liable to be altered and fixed at a different rate, when such land is appropriated for any other purpose, notwithstanding that the term, if any, for which such assessment was fixed may not have expired.

Assessment subject to variation if purpose for whic land is held is changed.

When any land which is situated in an unaliented village, or which, being situated in an alienated village, is excluded from the assets thereof, has been allowed by Government to be held free of assessment or on a reduced assessment on condition of its being appropriated to one purpose, it shall become liable to be charged with full assessment, if at any time it ceases to be appropriated for such purpose.

Land held rent-free for one purpose liable to assessment if used for another purpose.

It shall also be lawful for the Deputy Commissioner or for a Survey officer, subject to rules or orders made in this behalf under Section 235, to prohibit the appropriation of any unalienated land liable to the payment of land revenue for certain purposes, and to summarily evict any holder who may appropriate, or attempt to appropriate, the same to such prohibited purposes.

Appropriation of land to certain purposes may be prohibited.

Section 49, B. R. C.

Section 50, B. R. C.

(2). Whenever any such cess, fine or tax hitherto payable by an inferior holder shall be made leviable from the superior holder, it shall be lawful for such superior holder to recover from such inferior holder the amount of the commuted assessment fixed in lieu of such cess, fine or tax.

Superior holder may recover commuted assessment from inferior holder.

Section 51, B. R. C.

Excess of assessment may be levied on land inadequately assessed held with it.

(3) When it has been customary to levy a larger revenue upon any portion of land than such portion would ordinarily be liable to, in consideration of other land being held with it, which is wholly or partially exempt from payment of revenue, the excess of revenue payable on the said portion of land may be charged upon the land hitherto held wholly or partially exempt.

Section 52, B. R. C.

Assessment by whom to be fixed.

50. On all lands not wholly exempt from payment of land revenue, and not within the local operation of an order made under Section 235, the assessment of the amount to be paid as land revenue shall be fixed at the discretion of the Deputy Commissioner, subject to rules or orders made in this behalf under Section 113, and the amounts due according to such assessment shall be levied on all such lands.

Provided that in the case of lands partially exempt from land revenue, or the liability of which to payment of land revenue is subject to special conditions or restrictions, respect shall be had, in the fixing of the assessment and the levy of the revenue, to all rights legally subsisting, according to the nature of the said rights.

53. The Government may authorize the Deputy Commissioner or the officer in charge of a survey, or such other officer as it appoints, to fix such rates, as it may from time to time deem fit to sanction, for the use, by land-holders and other persons, of water, the right to which vests in Government, or which has been made available in consequence of the construction, improvement or repair of any irrigational or other work by, or at the instance of, Government. Such rates shall be liable to revision at such periods as Government shall from time to time determine and shall be recoverable as land revenue.

Section 56, B. R. C.

Unless the Deputy Commissioner shall, in particular instances, otherwise direct, no such application shall be recognized except it be made by the registered occupant.

77. And in any such case, the Deputy Commissioner may give to the person who has paid the land revenue as aforesaid such aid for the recovery of the proportional amounts which he may consider to be properly payable by other persons in occupation of parts of a field or survey number, as he might legally have given had the persons so paying been the registered occupants.

Deputy Commissioner may assist such persons in recovering the revenue from other parties liable therefor.

Section 81, B. R. C.

79. If it shall appear to the Deputy Commissioner that a registered occupant has failed to pay land revenue and has thus incurred forfeiture with a view to injure or defraud his co-occupants, or other persons interested in the continuance of the occupancy, or that a sale of the occupancy will operate unfairly to the prejudice of such co-occupants or other persons, it shall be lawful for him, instead of selling the occupancy, to forfeit only the said registered occupant's interest in the same and to substitute the name of any such co-occupant or other person as registered occupant thereof in the revenue records, on his payment of all sums due on account of land revenue for the occupancy, and such person so becoming the registered occupant shall have the rights and remedies with respect to all other persons in occupation provided for by Section 99.

Deputy Commissioner may in certain cases make co-occupant or other person the registered occupant instead of selling occupancy for realization of land revenue.

80. The provisions of the last two preceding Sections shall apply to alienated holdings *mutatis mutandis*, but nothing authorized or done under the provisions of the aforesaid Sections shall affect the rights of the parties interested as the same may be established in any suit between such parties in a Court of competent jurisdiction.

223. Subject to the exceptions hereinafter appearing, and except as hereinbefore expressly provided, no Civil Court shall exercise jurisdiction as to any of the following matters:—

(*a*) Claims against Government relating to any property appertaining to the office of any hereditary officer appointed or recognized by Government or of any other village officer or servant; or

claims to perform the duties of any such officer or servant, or in respect of any injury caused by exclusion from such office or service; or

suits to set aside or avoid any order relating to such office or service or such officer or servant, which may be passed by Government, or any officer duly authorized in that behalf; or

claims against Government relating to lands declared by Government, or any officer duly authorized in that behalf to be held for any service whatsoever;

(*b*) Objections—

(*c*) Claims connected with or arising out of any proceedings for the realization of land revenue, or the rendering of assistance by Government, or any officer duly authorized in that behalf, to superior holders for the recovery of their dues from inferior holders; or

(*d*) Claims against Government—

(1) to be entered in the Revenue survey or settlement, records or village papers as liable for the land revenue, or as superior holder, inferior holder, occupant or tenant; or

(2) to have any entry made in any record of a Revenue survey or settlement; or

(3) to have any such entry either omitted or amended ;

(*e*) the distribution of land or allotment of land revenue on partition of any estate under Bombay Act IV of 1868, or under this Regulation, or under any other law for the time being in force.

(*f*) claims against Government to hold land wholly or partially free from payment of land revenue ; or

to set aside any cess or rate authorized by Government under the provisions of any law for the time being in force ; or,

respecting the occupation of waste or vacant land belonging to Government ;

(*g*) claims regarding boundaries fixed under Bombay Act I of 1865 or under this Regulation, or under any other law for the time being in force, or to set aside any order passed by a competent officer under any such law with regard to boundary marks :

Proviso.

(*h*) any enactment or rules having the force of law for the time being in force expressly creating an exemption not before existing in favor of an individual, or of any class of persons, or expressly confirming such an exemption on the ground of its being shown in a public record, or of its having existed for a specified term of years ; or

(*i*) any written grant from the Government expressly creating or confirming such exemption ;

Such claim shall be cognizable in the civil courts.

Illustrations to (h).

(1) It is enacted that when a specific limit to assessment has been established and preserved, the assessment shall not exceed such specific limit. A is the owner of land worth Rs. 100 for assessment. He claims to be assessed at Rs. 50 only on the strength of a course of dealing with him and his predecessors under which his land has not been more highly assessed. There is no exemption not before existing created by enactment, and A's claim is not cognizable in a Civil Court.

(2) It is enacted that land revenue shall not be leviable from any land held and entered in the land register as exempt. A claims to hold certain land as exemption the ground that it has been so held by him and is so entered in the land register. This is an exemption expressly confirmed by enactment on the ground of its being shown in a public record, and A's claim is cognizable in a Civil Court.

(3) It is enacted that the Deputy Commissioner shall confirm existing exemptions of all lands shown in certain maps to be exempt. A claims exemption alleging that his land is shown in the maps to be exempt. A's claim is cognizable in a Civil Court.

(4) It is enacted that assessment shall be fixed with reference to certain considerations and not with reference to others. This is not an enactment creating an exemption in favor of any individual or class and no objection to an assessment under such an enactment is cognizable in a Civil Court.

(5) It is enacted that, in the event of the proprietary right in lands, the property of Government, being transferred to individuals, they shall be permitted to hold the lands for ever at the assessment at which they are transferred. The proprietary right in certain lands is transferred to A at an assessment of Rs. 100. An exemption from higher assessment not before existing is expressly created in favor of A by enactment, and he may seek relief in the Civil Court against over-assessment.

Section 5, B. R. J. Act.

Saving of certain suits.

224. Nothing in the preceding Section shall be held to prevent the Civil Courts from entertaining the following suits :—

(*a*) suits against Government to contest the amount claimed or paid under protest, or recovered as land revenue, on the ground that such amount is in excess of the amount authorized in that behalf by Government, or that such amount had, previous to such claim, payment, or recovery, been satisfied, in whole or in part, or that the plaintiff, or the person whom he represents, is not the person liable for such amount ;

(*b*) suits between private parties for the purpose of establishing any private right although it may be affected by any entry in any record of a Revenue survey or settlement, or in any village papers ;

(*c*) suits between superior holders and inferior holders relating to matters not otherwise expressly provided for by this Regulation ;

and nothing in Clause (*g*) of the preceding Section shall be held to prevent the Civil Courts from entertaining suits, other than suits against Government, for possession of any land being a whole survey number or a recognized share of a survey number.

Section 7, B. R. J. Act.

Punishment or prosecution of Revenue officers, no bar to civil remedies.

226. Nothing in any law for the time being in force which authorizes the punishment departmentally of any Revenue officer for any offence or breach of duty or which sanctions his prosecution criminally for such offence or breach, shall be held to bar any remedy which may be had in the Civil Court against such officer.

Section 11, B. R. J. Act.

227. If the Chief Court considers that any such statement is imperfectly framed, the Chief Court may return it for amendment.

The costs (if any) consequent on any such reference shall be dealt with as the Chief Court in each case directs.

Section 13, B. R. J. Act.

Power of Civil Judge to refer questions of jurisdiction to Chief Court.

229. If, in any suit instituted, or in any appeal presented, in a Civil Court, the Judge doubts whether he is precluded by this Chapter from taking cognizance of the suit or appeal he may refer the matter to the Chief Court.

The Chief Court may order the Judge making the reference either to proceed with the case or to return the plaint.

The order of the Chief Court on any such reference shall be final.

which gives a charge for establishment of 7·06 per cent of the total outlay.

The approximate cost of open line at the end of March 1886 after meeting the cost of new engines and rolling stock will be Rs. 65,47,000 at a rate of Rs. 46,764 per mile.

Lines surveyed.—The present terminus is at Gubbi on the N. W. extension. The surveys, plans and estimates for the extension to Tiptur (33 miles) received the approval of the Government of India in January 1884, but construction was deferred for want of funds. The amount including suspense is Rs. 13,71,003 at a rate of Rs. 41,786 per mile.

The surveys, plans and estimates for the extension beyond Tiptur to Harihar on the Mysore frontier 124½ miles was forwarded to the Resident on 13th July 1885 for submission to Government of India. The total estimate for this 124½ miles amounts to Rs. 49,29,939 or Rs. 39,607 per mile.

Surveys, plans and estimates for an extension from Mysore to Nanjangud 14¾ miles are ready. The total estimate amounts to Rs. 6,52,661 at a rate of Rs. 45,481 per mile. If however the existing bridge over the Kabani river is used for the railway, the rate per mile is reduced to Rs. 38,378.

Lines open to traffic.—During the year 1884—85, 54 miles of line were added to the open line, *viz.*,

Bangalore to Tumkur 43 miles on 11th August
Tumkur to Gubbi 11 miles { on 1st October (for goods).
on 26th December (for coaching).

The following figures showing comparative cost of certain metre gauge railways are extracted from a Table given on page 60 of Director General of Railways' Administration Report for 1884—85 :—

Statement showing total cost of each Metre Gauge Railway on 31st December 1884 and the Average cost per mile.

which gives a result in favor of Mysore of Rupees 28,396 per mile open if suspense is excluded and of Rs. 29,806 per mile open if suspense is included.

For further comparison Table B has been prepared from the classified expenditure including suspense appropriated on these lines up to 31st December 1884. The South Indian Railway (Rs. 66,214 per mile) has been omitted for want of detail and Burma is not entered as capital outlay given includes construction of line not open.

Table C has been prepared from Table B and shows under every head the outlay per mile on 7 Metre Gauge Railways including Mysore. The figures for Mysore differ from those of the previous year owing to the addition of 54 miles to its length.

Table D gives in detail the number of Engines and vehicles used in carrying traffic.

The rolling stock compared with the average of other Metre Gauge Railways is as under :—

Class of Stock.	Average of 8 Railways.		Mysore.	
	1883.	1884.	1883.	1884.

To this list should be added 6 N class Engines which arrived in Madras August 1885, 38 covered goods and 5 highsided wagons constructed before June 1885, and two 3rd Class carriages, one carriage truck, and 2 Powder vans under construction. Nineteen Lowsided wagons also ordered.

Passenger Traffic.—(Table F)—The number of passengers carried was 376,014 for Rs. 2,26,275 against 362,245 for Rs. 2,07,486 during 1883. The increase being 3·8 per cent in number and 9 per cent in money. The increased mileage open was however 20 per cent and to have preserved the rate of the previous year there should have been 575 more passengers carried and 225 more rupees earned per mile.

That is to say that although Mysore had only 36 per cent of the average work to do, its cost of working is scarcely more per train mile than for the larger amount.

A few remarks are now offered with regard to the working expenditure under the different heads.

Maintenance.—The average cost of maintaining one mile of line per month on other lines is Rs. 111 and in Mysore it is not more than Rs. 60 (including capital maintenance as revenue expenditure.) It will not be necessary to increase this sum to any great extent to meet an increase of traffic. The mileage cost per month on Tirhoot was 97, on Cawnpore-Achnera 54 and on Bhaynagar-Gondal 59.

Locomotive.—The total expenditure per train-mile is the same as the average on other lines, but compared with 1883 the gross ton miles in Mysore have increased 31 per cent and the locomotive expenditure has increased by 19 per cent.

The detail of expenditure for 1884 is :—

	Rs.	Per cent of Total.
1. General Superintendence ..	6,085	8·80
2. Running Expenses ..	16,342	23·65
3. Fuel	21,442	31·03
4. Water.	1,707	2·47
5. Oil	3,049	4·41
6. Maintenance and Renewal ..	9,468	13·70
7. Unclassified Expenditure ..	11,017	15·94
	69,110	100

The total quantity of fuel consumed in 1884 was 5,327 tons at a cost of Rs. 21,443. Wood fuel is procured from the Forest Department at Rs. 4 per ton and a small quantity (82 tons) of coal was obtained from Madras. The average consumption was 90·93 lbs per engine mile. The price of fuel is to be increased to include seigniorage, collection and carriage. The consumption per train mile in 1882 was 89·82 lbs; in 1883 it was 102·61 lbs and in 1884 it was 108·86 lbs. The comparatively low consumption in 1882 was due chiefly to the fact that A class engines were in use, and the higher consumption in 1883 and 1884 is due to N class engines with full loads, at the same time the quality of fuel is said to have been inferior.

The following table is extracted from page 34 of Director General of Railways' Administration Report :—

Railway.	Source and Description of fuel used.	Per train mile.	
		Consumption in lbs.	Cost in Annas.
1. South-Indian	English and Australian coal...	27·04	3·16
2. Rajputana-Malwa	English and Bengal coal and wood	33·25	5·10
3. Northern Bengal	Bengal coal	30·95	2·07
4. Tirhoot	Do	31·81	2·23
5. Cawnpore-Achnera	Do	32·52	3·74
6. Nagpur-Chhattisgarh	Warora coal	61·70	3·73
7. Burma	English coal, patent fuel and wood	20·18	2·70
8. Bhavnagar-Gondal	English coal	23·10	3·50
9. Mysore	Wood	108·86	3·13

The consumption of fuel on lines burning wood is as under.

Madras	91·69
Indus valley	100·67
Nizam's	76·67
	3)269·03

average 89·68 lbs. per train-mile, while Mysore has consumed 108·86 lbs.—

Carriage and Wagon Expenses.—The total expenditure is Rs. 13,638 or 0·12 per train mile against Rs. 14,884 or 0·17 per train mile of 1883. The details of expenditure compared with those of 1883 are given below:—

	1883.	1884
General superintendence...	7,376	6,084
Repairs and renewals, &c....	4,497	5,237
Cleaning carriages	3,011	2,317
	14,884	13,638

a reduction of 8 per cent on outlay of the previous year.

Traffic Expenses.—The total expenditure is Rs. 24,897 against Rs. 32,575 in 1883.

The train miles increased by 24 per cent, while the expenditure has been reduced by 33 per cent. The detail is as under:—

	1883.	1884.
Salaries and wages	23,262	23,508
Fuel, lighting, water, &c.	1,594	1,541
Clothing	570	728

Miscellaneous expenses	284	298
Payments to other lines	6,104	—1,708
Unclassified expenditure	48	43
Total.....	32,575	24,897

General Remarks.—Compared with the average of other lines during the year 1884, Mysore carried 41 per cent less passengers and 61 per cent less goods. With this amount of short traffic it has managed to keep its working expenses at 54·22 per cent of its gross receipts and return a dividend for the year of 2·64 per cent on the capital outlay for 140 miles. But as the mean mileage worked during the year was only 104·84 miles the net return in reality is $(\frac{2\cdot64 \times 140}{104\cdot84})$ at a rate of $3\frac{1}{2}$ per cent.

At present the Mysore system consists of 2 branches; one 86 miles and the other 54 miles in length. Had it secured the average traffic, the net return would have been $(\frac{8,84,978 \times 45\cdot78}{62,64,620})$ nearly $6\frac{1}{2}$ per cent. In addition to the capital outlay Rs 62,64,620 there is a further charge of Rs. 4,65,986 for simple interest in excess of net revenue to the end of the official year 1884—85.

The following correspondence relating to the White Silk Cotton tree (*Eriodendron anfractuosum*) commonly known as Biliburgadamara in Canarese, is published for general information.

No. 465-78—9, DATED BANGALORE, 21ST APRIL 1884.

ORDER THEREON.—Copies of Mr. Cameron's letter and enclosure thereto are forwarded to the Deputy Commissioners, Sub-Division Officers and the Forest Officers with a request that, after careful enquiry, a report may be forwarded showing in what Taluks the trees are now to be found, and where their growth is most luxurious, and what encouragement would be necessary to extend its cultivation. They are also requested to collect a quantity of the cotton and to forward it to Mr. Cameron, in order to enable him to make a trial consignment to Europe.

Abstract of replies to the above, received from District Officers.

In the Bangalore District the tree is found in betel-leaf gardens, but rarely on dry crop lands except in the Hoskote and Dodballapur Taluks. It is planted not for its cotton, but to protect the betel-leaf creepers. The Deputy Commissioner suggests that it may be sown in some of the fuel plantations and if successful there, the ryots might be induced to cultivate it on Government waste lands given them on easy terms. Another specimen is found in the jungles of the Kankanhalli Taluk, but it does not yield good cotton.

It is not found to any considerable extent in the Kolar District, nor do the people know how to utilize it to the best advantage. It is sparsely grown in some gardens for supporting betel-leaf creepers, the leaves and branches being often cut away for the safety of the creepers, and in consequence the tree seldom bears. The cotton is not collected, partly because there is no demand for it and partly because the out-turn is insignificant.

In the Tumkur District it is found to a small extent in almost all the Taluks, being grown in betel gardens as a support to the creepers. It is not found however in the forests of this District. As it has a flourishing growth in moist places where the soil is red, mixed with clay, the Deputy Commissioner suggests its being tried as an experimental measure in the Devarayadurga, and Maddagiri forests, and to encourage private individuals to grow it by Government offering to purchase all the cotton they can supply at a fixed price for 2 or 3 years. The ryots however do not yet know of its commercial value. The pods are usually collected in February and March, and if not done so, then they burst and the cotton is blown away by the wind.

In the Mysore District the tree is grown to a very small extent in some Taluks, and the ryots not being aware of the value of the seeds and of the cotton the fruit produces, pay little or no attention to its cultivation. In some places the fruit is allowed to dry and burst when the cotton is blown away by the wind. The tree is supposed to grow only on rich soil which contains moisture and which is fitted for garden cultivation. If the quantity of seed, the mode of cultivation, and the probable value of the crop which a given area of land can produce, be explained to the ryots and the seed supplied, the Deputy Commissioner thinks they may be induced to try the experiment on a portion of their lands, on condition of Government purchasing the out-turn at a fixed price for a couple of years.

The tree grows in the Mudgere, Koppa, Chikmagalur and Tarikere Taluks of the Kadur District, but to a very slight extent. No attempt has been hitherto made to cultivate it. It is difficult and expensive to collect the cotton owing to the great height to which the tree grows. The jungle fires which occur at the season when the pods ripen,

moreover, damage the cotton by blackening it. The Deputy Commissioner after a conversation with Mr. Dickinson, the Deputy Conservator of Forests in Coorg, is inclined to think that the forests below the ghats in the hotter and damper climate of South Canara is more favorable to the growth of this tree than the climate of the Mysore Coffee District, where it is met with only singly, but in South Canara in clumps.

It does not grow luxuriantly in any part of the French Rocks Sub-Division, and is occasionally planted in betel-leaf gardens to train the creeper on. The Sub-Division Officer thinks that if the ryots understand the value of kapok as a profitable article of commerce, they would plant it extensively, and he supports a proposal made by the Attikuppa Amildar that Government insist on ryots planting their village topes with kapok as an experiment.

The Chitaldroog Sub-Division Officer reports that a few trees are grown in betel-leaf gardens as supports for the creepers and for shade. The tree seems to require constant moisture and the dry climate of Chitaldroog does not seem favorable to its growth. The cotton is not sold as it has no market value. The fruit is allowed to drop off the tree and rot.

From the Assistant Conservator of Forests, Shimoga, To the Deputy Commissioner, Shimoga District, No. 171, dated Camp Chikmagalur, 27th July 1884.

With reference to your docket No. 155 of 10th May last, enclosing Dewan's Proceedings No. 465-78—9, dated 21st April 1884, I have the honor to submit the following report on the silk cotton tree (*Eriodendron anfractuosum.*)

As the tree fruits in the dry months of February, March or April, I was unable to make any collection of the cotton, and the Amildars, for similar reasons, have been unable to carry out your orders to make a collection.

The tree is found growing in small numbers in all the Taluks of the District, but is by no means plentiful in any one locality. It is not only indigenous to the forests, but is cultivated by the ryots in betel-nut gardens owing to its fast growth, to serve as a support for this vine, which entwines itself around the tree in its growth. In such cases, it is planted by means of stakes, as these "take" sooner than seed, from 4 to 6 feet apart, and as soon as it has answered its purpose, after a few years, it is cut down and removed with the decay of the betel.

The tree itself can be very easily cultivated and requires to be watered for one hot season only, after which the usual rains are sufficient to promote its growth.

In the forests the tree grows scattered here and there, and attains a good size, averaging from 4 to 8 feet in girth and from 10 to 20 or 30 feet in height; but the cotton is not collected for sale or any special purpose, and the pods have been often observed by me rotting on the ground in heaps under each tree. In some few cases the ryots collect some for stuffing.

The question whether it would pay to collect the cotton and despatch it to Bangalore from such a distance has to be settled. In any case, the tree is not plentiful enough in the forests to make it worthwhile attempting such a step at present, but if plantations are formed for this special purpose and the Railway is opened out as far as Shimoga, I have no doubt a small profit may be made from the artificial cultivation of the tree. The question of its paying or not even on a small scale can be best settled in the Bangalore District; and if the Superintendent of Government Gardens, Bangalore, makes a further report on the result of his trial consignment to Europe and on the utility of its cultivation on a large scale, the matter can be taken up in this remote western division of the Province.

I have observed that the tree is allowed to be cut down by a certain class of people commonly known as "Dombars" (Mutchi men) who use the wood for making toys and other articles, such as "kaibatlu" (hand trays), "konabi," &c. This should be put a stop to; and a circular issued to the Amildars to that effect. If the wood of this tree is much in demand by these men, they are at liberty to give a darkhast for the same; and the Forest Department may collect some of the older trees to the

depôts from which the timber may be sold by retail. It is a fact that the wood is soft and worthless for any other purpose, but the value of the produce (cotton) obtained from it requires some consideration. The "Dombars" of course have been accustomed to appropriate this wood free of charge from a long time, and would now consider it a hardship to be deprived of this privilege; but I have observed very large numbers of these trees cut down without any consideration wherever this class of people take up their abode, which is usually near the forests of remote villages; and I think it necessary that some restrictions should be placed on the wasteful cutting of this tree.

As regards the encouragement necessary to extend its cultivation, this is a difficult matter; but if the sale of the cotton is profitable at Bangalore, then the promise of the payment of a fixed price per maund from the profits to the cultivator may perhaps induce some ryots to cultivate the tree for the express purpose of the sale of its cotton.

A reward may also be offered in the first instance for each plantation of not less than 5 acres with the trees planted about 18 feet apart, the land for the same being granted free by Government.

Memorandum on the Silk Cotton trees of Mysore by Mr. Graham Anderson, South Mysore Planters' Association.

As the trees indigenous to Mysore have engaged a large share of my attention for many years past, I have perused with much interest Proceedings No. 465-78—9, dated 21st April 1884.

The Superintendent of Government Gardens in Bangalore deserves the thanks of the Agricultural Community for the attention which he has drawn to the subject of silk cotton, and it is earnestly to be hoped that in the future he will further assist by making public any information of a similar nature regarding other products which may appear to him worthy of introduction or cultivation, it being impossible to overestimate the benefits which the department over which he presides is capable of bestowing on the Province generally. As I have personally no pretensions to technical knowledge, I am not at all sure that I have correctly identified the kapok tree, but I most diffidently venture to make a few remarks on the silk cotton producing trees of Mysore, and to refer specially to one which in my humble opinion most closely answers to the description so obligingly afforded.

Among the varieties of the order *Sterculiaceæ* to be found in our Malnad I failed entirely to recognize the *Eriodendron anfractuosum*, and have consequently made some careful inquiries about it.

My remarks, I trust, may be of some service even if they only lead to prove that more yet remains to be learnt regarding the tree, both as to its identity and the possibility of extending its cultivation.

Bentley divides the order *Sterculiaceæ* into three tribes:—
Bombaceæ.—Examples; *Adansonia, Eriodendron, Bombax, Cheirostemon, Durio, Ochroma, &c.*
Helictereæ.—Examples; *Matisia, Helecteres, &c.*
Sterculieæ.—Examples; *Sterculia, Heritiera, &c.*
Lindley enumerates 37 genera and 128 species as belonging to this order. (Bentley).
The plants of interest are referred to as follows:—

Chorisia speciosa.—has its seeds covered with silky hairs which are used for stuffing cushions, &c. It is termed vegetable silk.

Eriodendron Samanna.—South America; remarkable for its great height. The hairy covering of the seeds of various species of *Eriodendron* is employed for stuffing cushions, &c.

Bombax Ceiba.—The silk cotton tree of South America.

Bombax Pentandrum.—The silk cotton tree of India. The seeds of these are covered with long silky hairs. These hairs cannot be used like those of ordinary cotton for manufacturing purposes, chiefly on account of the smoothness and want of adhesion between their sides. (Bentley.)

(3672). The wool of several species of *Eriodendron* and *Chorisia* is used for stuffing beds and cushions, and that of *Ochroma lagopus* substituted for beaver. (Page 819. Outlines printed by I. and C. Adlard).

In the Malnad the varieties of *Bombax* are as follows :—

Mul Buraga. (Canarese) (*Bombax heptaphyllum* or *pentandrum* (?)) a large, very thorny deciduous tree with a red flower. Yields very inferior silk cotton which cannot be twisted into a thread, the fibre being very brittle ; grows in the Malnad Forests.

Buraga, Biliburaga. Canarese.

A somewhat smaller, deciduous tree with a white flower. Hardly any thorns at all. Yields a somewhat better cotton which can only be used for stuffing purposes. Grows on the edge of the open country to the east, but is very rarely found in the Malnad. The bark is said to be used by the natives for intestinal disorders of cattle.

The cotton escapes from the pod about February, March and is very difficult to collect owing to the strong east wind which then prevails. The thorns of the *Mul Buraga* offer an insuperable difficulty to gathering of produce.

As the wool of the *Eriodendron* (*Erion*—wool *Dendron*—tree, Greek) is explained to have been spun into yarn and made into articles which have been submitted to the Colonial Museum at Haarlem and is further described as being used for tinder, I immediately concluded that our Biliburaga was not the tree referred to and consequently directed my inquiries to the eastward with the result that I found a tree known as the *Dudi Mara* (Canarese, the *Tinder* tree) (Yellam panji, Tamil), in Hassan. This tree is propagated both from seed and trunk cuttings and is used in the supari gardens for growing the *betel-leaf creeper* upon.

The silky wool of this tree is certainly very superior to the produce of any of the buragas and hitherto has, I regret to say, quite escaped my observation.

The sample herewith sent, together with one of the pods, will suffice for indentification.

Should this tree be the kapok, the knowledge that the produce is a marketable commodity will go far to at once induce owners to carefully collect it.

I should imagine that all well-drained good soils would be suitable for the growth of the dudi tree and all jungle lands would answer admirably.

The tree is however not one that would stand wind and being deciduous would not do for shade for coffee. I am doubtful as to whether the crop would be one which could be remuneratively gathered in the wet climate of the Malnad as it appears to mature in June or just at the beginning of the South-West mousoon.

The experiment is however well worthy of trial on a small scale on abandoned clearings and jungle scrub land.

In a strictly agricultural Province like Mysore, an immense amount of good can be done by the introduction of new products and I most sincerely hope that the skilled services of the Superintendent of the Government Gardens may be utilized in that direction precisely in the same manner as in the Crown Colony of Ceylon and elsewhere.

The matter of exchange and introduction of seeds with Foreign Countries is an impossibility with private individuals, and the single fact that the dudimara has hitherto been almost wholly neglected is a good example of the immense benefits which the talented Superintendent of the Government Gardens could confer on the agriculturist if the requisite facilities and funds were placed at his disposal.

Judging from these reports, the tree is most abundant in certain Taluks of the Tumkur, Mysore, Shimoga and Hassan Districts, and in the forests of Shimoga and Hassan. The reports of Messrs. Lovery and Graham Anderson are of special interest and these gentlemen deserve credit for the amount of information given.

In cultivation, the tree is extensively used as a support to the betel-vine, a purpose for which its rapid growth and naked under-stems render it well suited. It attains its largest size in moist ground, and Mr. Dickinson, the Conservator of Forests in Coorg, is of opinion, that the moister climate of South Canara is better adapted to its requirements than any part of Mysore.

The tree can be readily propagated from pole or stake-cuttings, which is an important matter in facilitating the quicker development of fruit bearing plants.

Kapok is ready for harvesting in the beginning of summer or in the months of February and March.

When separated from the fruit and cleaned, the total amount of kapok received from the Districts did not exceed 30lbs, from which quantity an assortment of 22lbs was well cleaned and equally divided for despatch to the Valuators at London and Rotterdam. The reports now submitted from the latter (Messrs. Collyer & Co., and J. C. Klutgen) are favorable as regards the quality and condition of the samples submitted for valuation, but the prices offered are so low that, I doubt the expediency of taking any further steps to advance this industry.

Where kapok is plentiful in the forests it might pay to collect and export it, but certainly not in any limited area of cultivation. The London market does not require kapok, but they are anxious to obtain a few similar materials at low prices. The sample received from Messrs. Collyer & Co., is the seed-cotton of *Calatropis gigantea* (Canarese ಎಕ್ಕಿಗಿಡ) a plant which is most common, nearly all over the plains of India.

From Collyer & Co., Brokers, London, dated 6th February 1885.

We have received one case of *Sennil Cotton* per S. S. "*Khedive*" through Messrs. Arbuthnot and Co., Madras.

There is but little demand for this material for home consumption, but large trade is done in it between Holland and the Dutch East Indies, the quality of the latter being preferred owing to its greater length and lightness. Your sample is rather short, fairly but not quite well cleaned, nominal value about 50s. per cwt, and would sell for export in considerable quantities.

For home use a somewhat similar material is wanted, small sample enclosed, we should be glad to receive samples of what you can offer, and lowest price you can supply specified quantities at freight paid to London, the extent of the demand will depend upon the quantity obtainable at low prices, say 5d to 6d per lb. nett weight. Please state clearly what quantity you can sell and in what months it could be sent forward and total quantity available if collection is worth attention.

From Collyer & Co., Brokers, London, dated 13th February 1885.

We confirm our report of 6th instant. It is uncertain how far a material reduction in price will stimulate consumption, the stock in Holland is large, say 2 to 3,000 cwts or more, the average price for good clean quality is there 70 to 90 per cwt, the value put upon your sample in Amsterdam was 47 to 55 per cwt. Our manufacturers of Down Quilts, &c., will not admit kapok into their factories, preferring to maintain there high standard of quality by using actual Feather Down. Probably new uses may be found if the material becomes plentiful and cheap. As indicated in our last, a demand is arising for long stapled varieties. We sent one sample last week, we enclose another even more wanted which appears to be "Sennil," this would sell freely at 5d to 6d per lb. for a special purpose.

Any further samples you can send us shall have our best attention not only of "Sennil" but of any new variety of fibre or other products.

Kapok or "Sennil" seed sells slowly at about £5 per ton, probably at £4—10—0. Landed in London it would go freely.

From J. C. Klutgen Rotterdam, dated 24th February 1885.

I feel much obliged for the pains you took in addressing me, the case containing kapok from your forests, and which you announced me by your favor of 20th January 1885.

I received that case in most perfect order, and I am pleased to declare that, this quality of kapok is not inferior to that from Java.

Perhaps it might interest you to hear that kapok cleaned in this manner, now is paid 5d, per ½ Kilo or 4½d. per English lb. (English currency sterling) free in the harbour of Rotterdam.

RESOLUTION.

READ the following—

Statistics and Commerce Despatch, No. 49, dated London, the 14th May 1885, from Her Majesty's Secretary of State for India.

I FORWARD 225 copies of the official report of a meeting of the Royal Commissioners for the Colonial and Indian Exhibition of 1886, held at Marlborough House on the 30th March, sent to me by Sir Philip Cunliffe Owen, Secretary to the Commission, for distribution to intending private Exhibitors in India.

2. You may perhaps consider it advisable to publish the report in the Official Gazettes, for general information.

Proceedings of the first Meeting of the Royal Commission, for the Colonial and Indian Exhibition, held at Marlborough House, Monday, 30th March 1885.

P., Mr. Bertram Wodehouse Currie, Mr. William George Pedder, and Sir Philip Cunliffe-Owen, secretary.

His ROYAL HIGHNESS, in opening the proceedings, said :—

MY LORDS AND GENTLEMEN,—In addressing you for the first time, I would remind you that the objects for which Her Majesty has been pleased to appoint this Commission are, briefly, to organize and carry out an Exhibition by which the reproductive resources of our Colonies and of the Indian Empire may be brought before the people of Great Britain and by which also the distant portions of Her Majesty's Dominions may be enabled to compare the advance made by each other in trade, manufactures, and general material progress.

The project, to the realization of which I have looked forward for some years, is essentially one of a National and Imperial character, differing in this respect from former Exhibitions, in which the elements of trade rivalry and profit largely predominated.

No such opportunity of becoming practically acquainted with the economic condition of our Colonies and the Indian Empire has ever been afforded in this country. The attractive display in the Indian and Colonial Courts at the Paris Exhibition of 1878 could only be witnessed by a comparatively small number of the population of these Islands, millions of whom may be expected to view and profit by the evidence which the Exhibition of 1886 will afford of the marvellous progress made by their fellow-countrymen beyond the seas.

I also trust that this gathering may serve even a higher purpose, and be the means not only of giving a stimulus to commercial interests and intercourse but of strengthening that Bond of Union between Her Majesty's subjects in all parts of the Empire, the growth and manifestation of which are most sincerely appreciated by us all.

Whilst Her Majesty's Government have given their hearty approval to the objects for which the Commission has been appointed, they have not so far found it desirable to make any definite grant towards it. The Commission have, therefore, to rely entirely upon the public support of the great purposes which the Exhibition is intended to promote; and on the attractive form which it will be the endeavour of all concerned to give to it.

I cannot doubt but that, under such conditions, should no untoward events occur, the project will be more than self-sustaining.

At the same time, it has been thought prudent not to dispense with the usual provision of a Guarantee Fund, though I trust, no circumstances may arise rendering it necessary to make any call on the Guarantors. To this Fund, the Indian and Colonial Governments have made liberal contributions, amounting to £51,000.

I have also to announce with much gratification that the most cordial and generous response has already been made by Corporations, Firms and individuals in the United Kingdom to an invitation to participate in this Guarantee. Although no formal or public appeal has yet been made, and the number invited to contribute to it has so far been limited, the list of subscribers not only embraces those whose interests may be supposed to be specially affected by the Exhibition, but comprehends every class of the community. Though but recently commenced, these further subscriptions already amount to £77,600, making a total Guarantee Fund of £128,600 to the present date.

I feel sure that you will unite with me in the expression of cordial thanks to those who have so promptly and liberally come forward to our assistance. It is a gratifying proof of the interest which exists among all classes at Home and in the outlying countries of the Empire, and of the desire felt by them to embrace every occasion to promote the common advancement and prosperity of the United Kingdom and its Colonies and Dependencies.

Considering the inconvenience which would have resulted to the Members of the Commission had they been summoned to meet at an earlier date, and in view of the immediate assembling of the various Colonial Legislatures, whose co-operation had to be obtained, I deemed it necessary, in order that full time might be given for the preparation of contributions, to take certain preliminary steps, which I trust will meet with your approval.

I have accordingly to announce that arrangements have been made by which the Buildings and Grounds at South Kensington, where the Fisheries and Health Exhibitions were recently held, have been placed at the disposal of this Commission, on fair terms, and the Buildings can be made available for our purposes at a moderate outlay.

I therefore caused plans of these Grounds and Buildings to be prepared, showing the space which the Commission could assign to India and the various Colonies, and the arrangements which were deemed most convenient. These were communicated to the Government of India, to the High Commissioner for the Dominion of Canada, to the various Agents-General of the Colonies, and, through the Colonial Office, to the Crown and other Colonies, and have met with their approval. Similar communications have been made through the Secretary of State for the Colonies direct to the various Governments, and to the Secretary of State for India with like results.

In the despatch which contained this information, I also stated that it was considered advisable that, in place of any awards being granted by Juries, as has been the case in previous Exhibitions, Commemorative Medals only should be given to each exhibitor. The object in suggesting this change was, that as some Colonies, from their age and circumstances, were more advanced than others, those in their infancy should not be placed at an undue disadvantage in an Exhibition from which all thoughts of trade rivalry should be excluded.

I am pleased to say that answers have been received which show that the suggestions made on this and other matters have been favorably accepted; and to inform you that the project of holding the Exhibition has been everywhere received with the utmost cordiality.

I trust that these preliminary arrangements may meet with your approval.

I have also to submit for your consideration the general method of administration which I recommend should be adopted.

As President of the Royal Commission, it is my intention personally to take the same active part in the work as I did at the Paris Exhibition of 1878.

The details of the Executive duties will devolve on Sir Philip Cunliffe-Owen, whose ability and experience have so often been tested with satisfactory results, and who has also been entrusted by the Indian Government and certain of our Colonies with Executive duties on their behalf.

I have also thought it desirable to nominate a Finance Committee for the purpose of controlling and the regulating the expenditure of the Commission and guarding the interests of the Guarantors. This Committee, it is proposed, shall consist of the following members of the Commission, who have kindly placed their services at my disposal, *viz.*, Sir John Rose, Bart. (Chairman); Sir George C. M. Birdwood; Mr. Edward Birkbeck; Sir Barrow Helbert Ellis; Sir William Charles Sargeaunt.

I will ask you to confirm the appointment of these gentlemen.

As arrangements advance, it may be necessary for me to recur in matters of special importance to your counsel and aid.

While no effort will be spared to render the Exhibition worthy of the primary objects, it is intended to promote, as well as to insure its attractiveness to the Community, the Guarantors may be assured that, subject to the attainment of these ends, no needless outlay will take place; but that, on the contrary, the expenditure will be kept within proper and legitimate limits. As an earnest of this endeavour I have directed full and detailed estimates of the different heads of proposed expenditure—guided by the experience of formor Exhibitions—to be prepared for submission, first, to the Finance Committee, and subsequently for my own approval.

Though it is impossible to foresee what eventualities may arise, I trust no obstacles may occur to prevent this Exhibition from being, not only self-sustaining, but as successful, financially, as those of late years have been.

It has been suggested that advantage should be taken of the great numbers who will doubtless visit England during the Exhibition from the Colonies and from India, to procure for them special facilities for visiting the great manufacturing centres and chief places of interest in Great Britain, not only as an expression of welcome, but that they and we may profit by a comparison of their own with the more matured commercial systems of the Mother-Country, and that by bringing manufacturers, producers and consumers together, an impetus may be given to the general extension of industry and trade.

Negotiations are in progress to effect this object which I hope may result, not only in mutual advantage, but in proving to our fellow subjects that they are as welcome elsewhere in Great Britain as I am sure they will be in the Metropolis.

In conclusion, let me express the hope that this great undertaking and the many occasions for friendly intercourse with our fellow subjects from India and the Colonies which it will afford, may convey to them the assurance that, while we are deeply moved by the spirit of patriotism they have lately shown in desiring to bear their share in the graver trials of the country, we, on our part, wish to participate in every effort to further and develope their material interests, interests which we feel to be inseparably bound up with the prosperity of the Empire. We must remember that, as regards the Colonies, they are the legitimate and natural homes, in future, of the more adventurous and energetic portion of the population of these Islands. Their progress, and their power of providing all that makes life comfortable and attractive, cannot, therefore, but be a matter of serious concern to us all. And, as regards India, the increasing knowledge of that vast Empire and the rapid and easy means of communication to all parts of it which now exist, render its remarkable and varied products and its social and political condition a source of yearly increasing interest and importance to us.

For the attainment of the purposes I have indicated, I am sure I may rely on your friendly co-operation and assistance, in your several localities, and within the sphere of your individual influence. Although it has been impossible from the pressure of their duties elsewhere for some members of the Commission to be present at this meeting, I am gratified by the assurance from them that we may none the less rely on their practical and earnest assistance on every occasion in furthering the work which has been entrusted to us, and achieving the important ends which I trust may flow from its successful accomplishment.

It only remains for me to express my cordinal thanks to you for your kindness in attending here to-day; and my confidence that I shall continue to receive the same measure

of support which it has been my good fortune to obtain from many of you on former occasions.

Sir Philip Cunliffe-Owen then read the correspondence relating to the appointment of the Commission and the participation of the various colonies, all of which were most willing to take advantage of this opportunity of displaying their resources and progress, and gaining a larger knowledge respecting their sister colonies.

A preliminary list of Guarantors was also read, the amount of the Guarantee Fund being already £ 128,600.

The EARL OF DERBY said: I have been asked to move a resolution, and I do it with great pleasure, but also very briefly, because argument is superfluous where I presume we are all of one mind, and it would be a mere waste of time to relate the circumstances, with which you are no doubt familiar, which should induce you to accept this resolution. There was a time, a few years ago, when it was said exhibitions were played out, and that it would be well, for a time at least, to discontinue them. I do not know whether that feeling was ever justified by the facts; it may have represented a passing phase of opinion in London, but it is not the case now. We have had recent experience, and we have seen that, whatever the ostensible objects of the exhibition, whether appliances of health, fisheries, forestry, or whatever the subject may be, the interest that is felt in these exhibitions is unabated, and ever-increasing. The numbers frequenting them seem to increase every year, and if they are well conducted, there can be no doubt they will be a financial success. If this be true, generally, it is still more likely to be true in the case of the exhibition which is to be held next year. I think we must all see and feel that there never was a time in the history of the country when so deep and general an interest was taken in the affairs of the Colonies; and I think also we all feel that, living as we do in a small and overcrowded island, it is both our duty and our interest to do all in our power to bring before the minds of our fellow countrymen those vast countries beyond the sea, in which those who have comparatively small opportunities of making a successful career in this country may have a better chance in another state of society. After the correspondence which has been read, it will not be necessary for me to recapitulate the details of what has passed, especially as His Royal Highness has been kind enough to state what is most important on that point. I will only say that to me, and those with whom I have acted departmentally, and I think I may say the agents of the colonies, it has been a source of pride and satisfaction to be able to help according to the measure of our power in promoting the wishes of His Royal Highness. I think, although the matter is not completed, and therefore it is undesirable to enter into details, that our colonial fellow subjects, both as regards governments and communities have responded to the appeal made to them in that liberal and patriotic manner we have every reason to expect. You have heard the list of Guarantors read; it is, I believe, an ample one for all purposes, and no doubt can be increased if necessary; and, looking at the increased interest in Colonial affairs, and the way the Colonies have taken the matter up, I think there is no doubt that this exhibition will be a great success. The purpose of the resolution I have to propose is that the Royal Commission may endorse the steps taken by His Royal Highness; and I think I may say that no passage in His Royal Highness's address has given so much satisfaction as that in which he gives us an assurance that he will take the same position in this exhibition as in that of 1878.

The EARL OF KIMBERLEY seconded the resolution, and said: As regards India, I have this exhibition much at heart. There is, perhaps, nothing more desirable for India than that its products and industries should be well known in this country, although we have much more to learn from than to teach them. Their beautiful manufactures which

ave produced, for so many ages have proved, that there is a knowledge of many
hes of art which it would be a thousand pities should be diminished under our rule.
often been struck with the calamity of the introduction of our taste into Eastern
d manufactures; for their taste is far better than ours, although we have no doubt
ering knowledge and skill and the command of capital; and I cannot conceive of
dvantage greater than that the two countries should be brought together. The
nment of India will itself undertake the collection and management to a great extent
t is to be sent into this country. You will see from the immense size of our Indian
e, and the position of the Government there, that it is much better this should be
in hand by the Government. It is a great satisfaction to me to concur entirely
he proposals made by His Royal Highness, and with my noble friend that this exhi-
will be a remarkable success.

The following is the resolution, which was carried unanimously: "That this Commis-
ntirely approves of the arrangements made by His Royal Highness the Prince of
, the Executive President, and now reported by him in detail: and they desire to
their cordial thanks to His Royal Highness for the interest he has shown in the
naking, and their appreciation of the judicious steps taken by him to insure its
s. The Commission further desire to express their cordial appreciation of the liberal
ratifying contributions already made to the Guarantee Fund, and their warm thanks
subscribers."

The PRINCE OF WALES: I feel very gratefull to Lord Derby for the kind way in
he has moved this resolution, and to Lord Kimberley also for the kind expressions
ave fallen from him, and for the hearty and unanimous approval of this Commission,
I look upon as a vote of confidence in myself. I may say that to the utmost of my
and endeavour I will do all I can to further the exhibition, and I feel sure that I
have the hearty support and concurrence of the distinguished gentlemen of whom I
many around me. I thank you again for having listened to the address I read to
nd only hope that no untoward event may occur between now and next year to
nt this resulting in perhaps the finest exhibition that has ever been held.

The meeting then terminated.

ADDRESS

OF THE

DEWAN OF MYSORE

TO THE REPRESENTATIVE ASSEMBLY AT MYSORE

on Wednesday, the 21st October 1885.

GENTLEMEN.—It is my privilege to lay before you to-day, by command of His Highness the Maharaja, a brief statement of the important facts connected with the administration of the Province during the past year.

Postponement of Enhanced Subsidy.—Before submitting to you the usual financial statements, I beg to announce to you the important fact that the Government of India have been graciously pleased to recommend to the Secretary of State the postponement of the enhanced subsidy for a further period of 10 years. A brief reference to the history of this question will not be uninteresting to you. The amount of the subsidy, as fixed by the Treaty of 1799 and as hitherto paid, is 24½ lakhs of rupees. Under that Treaty, however, Mysore was also bound to pay contributions to the British Government towards the increased expenses of war. This indefinite liability for contributions in time of war, was commuted by the Treaty of 1807 into an obligation to maintain a body of 4,000 effective horse in peace and war, such portion of this force as, in the opinion of the British Government, may not be required for the internal protection of the country, being maintained at all times ready to accompany the British Army on service beyond the Mysore Territory. The Instrument by which the administration of the Province was transferred to His Highness the Maharaja, commuted this obligation to maintain a Cavalry force for external service, into one to pay 10½ lakhs of rupees per annum by way of an addition to the subsidy. Acting, however, under the influence of a sincere desire not to place an undue burden on the finances of Mysore in the early stage of the Maharaja's rule, the British Government postponed this addition of 10½ lakhs to the subsidy, for a period of 5 years from the date of Rendition. During the past four years, the financial position of the State has received the careful consideration of His Excellency the Viceroy in Council. His Excellency

has recognized the fact that the revenue of Mysore is not now so large as was anticipated at the time when the addition of 10½ lakhs to the subsidy was fixed, and, in view of the present embarrassed condition of the Mysore finances and of the demands upon the resources of the State, His Excellency has been pleased, as already stated, to recommend to the Secretary of State that the enhanced subsidy shall be foregone for an additional period of 10 years. This is only a fresh but a very signal illustration of the generous treatment which the Mysore State has invariably received at the hands of the Paramount Power. His Highness' Government are deeply grateful for this boon, for without it, it would not at present, be possible to maintain the administration of the Province at its present standard of efficiency. The ten years' postponement, however, gives the State sufficient time within which to recover from the effects of the late famine, and I beg to give you the assurance that His Highness' Government will spare no efforts, loyally to meet the Treaty obligation in question at the expiry of the time so graciously allowed.

Surplus Revenue of the Civil and Military Station of Bangalore.—Another subject which has been decided by the Government of India is that the surplus revenue of the Civil and Military Station of Bangalore, which is administered by the British Government, shall be credited in the Imperial accounts.

In accordance with this decision, the receipts and expenditure of the Civil and Military Station have had to be excluded from the Provincial revenue and expenditure.

Receipts and Expenditure for 1884—85.—After making this deduction, the ordinary revenue of the State amounted to Rs. 1,00,70,975 and the expenditure to Rs. 99,55,601 as shown in the following statements :—

At the close of the year, there was only a small surplus of Rs. 1,15,374, which compares rather unfavorably with the surplus of nearly 3½ lakhs at the close of the previous year. This result was not due to any increased expenditure. It was due entirely to a falling off in the revenue. Under Land Revenue, the realizations were 6½ lakhs less than in the previous year, because the year was one of partial drought throughout the northern and eastern parts of the Province, and the Government had either to postpone or to remit a portion of the Land Revenue in the affected tract.

Abkari, however, yielded 2¼ lakhs more than in 1883—84, owing to the larger amounts which the Government were able to secure from the new toddy and arrack contracts entered into in the beginning of 1884—85. These contracts are, as usual, for a period of 3 years. Sayer shows a slight improvement of about half a lakh. Under Forest Re-

venue, the demand for sandalwood was unusually slack, and the sales realized only Rs. 3,22,308, or 1¼ lakhs less than in 1883—84. This however was made good by the larger sale of timber to the public, and by the supply of sleepers and fuel to the Railway. Thus, on the whole, the Forest Revenue amounted to Rs. 6,57,564, *i. e.*, about a ¼ lakh better than in the year previous. We ought not, however, to calculate upon sales of timber and fuel on such an extensive scale, for, the forests, especially the Fuel Reserves, require some rest. Under Miscellaneous items of Revenue, there was an increase of nearly 1 lakh. This was due chiefly to the Secretary of State's decision which recognzed the services of British Officers in Mysore pricr to 30th September 1882, as British Service for purposes of pension and leave allowances. This order secured to the State a refund of the contributions on account of their pensions and leave allowances which had previously been paid to the British Government. Thus the large decrease of 6½ lakhs under Land Revenue being made good in part by increase under other heads of revenue, the total income was only 2½ lakhs less than in 1883—84. Among items of expenditure, there have been no important variations of any kind, and the total expenditure has been maintained as in the previous year at the normal figure of about 99½ lakhs.

As already remarked, the foregoing figures exclude the revenue and expenditure of the Civil and Military Station of Bangalore. The surplus revenue of the Station, which was included in the Provincial Cash Balances till the beginning of the last year, may be estimated at about 1½ lakhs per annum.

Budget Estimates for 1885—86.—The Budget for the current year, as finally revised, estimates for an income of Rs. 1,04,23,500. Under all heads of revenue except "Land Revenue," the estimates are based upon the actual realizations of the past and previous years. Under Land Revenue, an income of Rs. 73,11,000 has been estimated for, though the actual realizations in the past year amounted to only Rs. 66,83,886. After the late Famine, the Land Revenue decreased to about 70¼ lakhs, which was the amount realized in 1881—82 and 1882—83. The average realizations in the years immediately preceding the Famine were about 73 lakhs, and this figure was again reached in 1883—84. This improvement has not unfortunately been permanent, for, the last year was one of very scanty rain-fall and short harvests, and it is followed by the exceptionally unfavorable season of the present year. Under such circumstances, the Land Revenue demand for the current year is likely to be only about 70 lakhs, but I believe it probable that the actual realizations, including the postponements of 1884—85, may be about 73 lakhs as estimated in the Budget, if the present favorable aspect of the season continues.

The Budget estimates for an expenditure in the current year of Rs. 1,02,39,810 against an actual expenditure of Rs. 99,55,601 in the past year. The increase is almost entirely due to the grant for Public Works being increased from 9½ to 12 lakhs, under circumstances which will be explained hereafter. "Police," "Education" and "Medical" are the only other heads, the increase under which calls for any remark. In the Police Department, it was found necessary, in the interests of its efficiency, to revert to the

former system of employing separate Assistant Commissioners for the exclusive charge of the Police, under the orders of the District Officers. This measure has necessitated a re-distribution of the cost of Assistant Commissioners between the Revenue, Judicial and Police Departments.

The improvement of the status of School Masters and a larger provision for grants-in-aid account for the slight *increase under "Education," while †that under "Medical" is due to the gradual substitution of Assistant Surgeons in the place of Apothecaries, and to the increased provision for purchase of medicines.

State Railway.—I shall now proceed to place before you the statistics connected with the State Railway. At present 140 miles of Railway from Mysore to Gubbi is open for traffic. The total cost of this length up to the end of 1884—85 amounted to Rs. 62,94,170, as follows :—

	Rs.
Bangalore-Mysore Section, 86 miles open throughout the year ..	43,56,690
Bangalore-Tumkur Section, 43 miles opened on 11th August 1884 .	16,48,476
Tumkur-Gubbi Section, 11 miles opened on 26th December 1884 ..	2,89,004
Total . ..	62,94,170

The revenue receipts amounted to Rs. 3,80,875, and the expenses to Rs. 2,07,087 leaving as net earnings Rs. 1,73,788, which added to the surplus of ordinary revenue, Rs. 1,15,379, gave a total cash balance of Rs. 2,89,167 at the close of the last year. The net Railway earnings were about 2·76 per cent on a capital outlay of about 63 lakhs till the close of the last year; but as only a portion of the total line of 140 miles was open throughout the year, the mean mileage worked was about 105 miles, and the net earnings *pro rata* are 3·68 per cent.

In addition to the capital expenditure up to the close of 1884—85, a further sum of Rs. 2,51,040 is provided for expenditure in the current year to meet the cost of six new engines which have lately arrived, and of some additional wagons and of improvements to the line. The total cost will thus be Rs. 65,45,210, or Rs. 46,751 per mile; and the earnings may be said to return 3·53 per cent on the capital.

The extension from Gubbi to Harihar, 157·282 miles, has still to be constructed. Surveys, plans and estimates as far as Tiptur, (32·81 miles), received the approval of the Government of India in January 1884; and similar papers for the portion between Tiptur and Harihar (124·472 miles), were forwarded to the Resident on 13th July 1885, for submission to the Government of India. The estimated cost of continuing the Railway beyond Gubbi to Harihar, (157·282 miles), amounts to Rs. 63,00,939 at a rate of Rs. 40,062 per

mile. The difference in cost between what has been done and what has to be done is thus Rs. 6,689 per mile, the saving being due to, cheaper survey, less bridging, accommodation already established at Head-quarters, plant now available, less equipment in rolling stock at outset, and saving in establishment.

The Durbar has lately accepted a proposal made by the Government of India that the extension from Gubbi to Harihar should be executed with foreign capital. Negotiations are, it is believed, in progress between the Secretary of State for India on behalf of Mysore, and the Southern Mahratta Company, whereby the present line of 140 miles is to be hypothecated for the amount of its cost to the Company, who are to raise the additional capital required and carry out the extension. The amount which Mysore is to receive on the hypothecation of its present line is to be paid to the British Government in part liquidation of the Famine Loan. The terms under which the Company is to construct the extension and maintain, manage and work the whole system of the "Mysore State Railway" are to be similar to those of the existing contract between the Secretary of State and the Company as regards the Deccan Railways. Under this arrangement, Mysore will guarantee to the Company interest on its capital during the first five years, the State receiving the whole of the net earnings of the Railway during that period. After the first five years, the rate of guaranteed interest payable to the Company will be reduced to 3½ per cent, and the Company will then, in addition, retain for itself ¼th of the net earnings, the remaining ¾ths being handed over to Mysore. Due provision will be made for the Government retaining in its hands a control over the accounts and expenditure of the Company, and for Police arrangements on the line. The whole Railway is redeemable at the end of the 25th, 35th, or 45th year. These terms are, it will be seen, not unfavorable to Mysore. The amount to be received by the hypothecation of the open line, which, as already shown, has cost about 65 lakhs, will go a great way towards liquidating the Famine Loan which now amounts to about 77½ lakhs of Rupees. In this way Mysore will soon be free to apply to its own advantage, the heavy payments it now makes towards the repayment of this loan; while the liability on account of the guaranteed interest will not be serious, if the returns on the completed system are maintained at a figure which Mysore has a right to expect from its own experience in managing the small sections it has already constructed. If the cost of construction is limited to the amount provided by Mysore estimates, the difference between the 3½ per cent guarantee and the Mysore share (¾ths) of the 3 per cent earnings, will only amount to about Rs. 78,000 per annum. This charge is not to be considered as too high a price to be paid for a few years, for the advantage of securing at an early date a long length of Railway within the Province, with the option of purchasing it hereafter when the finances are in a more flourishing condition. The annual charge above referred to will cease when the Railway begins to earn 4½ per cent on the capital; and, when it earns more than that rate, it will become a source of revenue to the State. Thus, on the whole, the proposed arrangement with the Southern Mahratta Company is one which is calculated in every way to advance the best interests of the State.

In connection with the subject of Railways, I regret to have to inform you that our Consulting Engineer Colonel A. LeMessurier is shortly to leave us. He came to Mysore in November 1879, when the construction of the Mysore-Bangalore Railway had made very little progress beyond the earth-work done as relief work during the late famine. The early and satisfactory completion of this line, as well as its further extension to Gubbi was in a large measure due to his untiring energy. The Government always found in im a valuable adviser in all D. P. W. matters generally, and his exertions to train e young Native Engineers for Railway survey and construction, have been emintly successful. His Highness' Government regret very much that they are so soon to lose his services, and I take this opportunity of expressing their high appreciation of the valuable services rendered by him to the State during the six years he has been with us.

Season Prospects.—In my address to you on the occasion of the last annual meeting, I alluded to the then unfavorable prospects of the year. Happily the apprehensions at that time entertained were not realized. The north-east monsoon proved favorable and was sufficient to save a portion of the standing crops, though quite insufficient to fill the tanks, or to allow of more than one-half of the usual amount of wet cultivation under them. The dry crops in the north-eastern and eastern Districts yielded only a harvest, which varied from ¼ to ½ of the usual average. On the whole, however, a moderate harvest was secured and proved sufficient to avert immediate distress. During this year again, the unfavorable conditions of the first half of 1883—84 have repeated themselves in a more aggravated form. The south-west monsoon began very well in May, and continued to promise fair during that month and June. In July, however, it showed signs of failing, and, as the season advanced, the drought became greater and more general. Till about the end of September, the rain which fell was extremely scanty. The dry crops began to wither from the long continued drought. The early crops were entirely lost in parts of Mysore, Chitaldroog and Tumkur. In parts of Kolar and the Maidán portions of Kadur, the early rains were so scanty as not to allow of sowings to the usual extent. The tanks everywhere were empty, and no Kartik wet cultivation was carried on under them; and even in the Malnad, the rains were insufficient for the paddy crops. In Maidán Taluks the springs rapidly dried up, and much difficulty was experienced as regards drinking water. Fodder for cattle became scarce, and the Government had to open its Reserved Forests for purposes of pasture. Prices began to rise, and the mortality among cattle sensibly increased. There was thus every sign that the Province was in a most critical condition. It was evident that if the drought continued much longer, there would be wide-spread scarcity, which, if the north-east monsoon too failed, would soon deepen into a famine. When the prospect looked so gloomy, the rains of the 25th September and the following days removed all cause for immediate apprehension. The season has since assumed a very favorable aspect, and if this continues, we may calculate upon a tolerably fair harvest, though one rather below the usual average.

Relief Measures.—It will however be satisfactory to you to know that in view to meeting the apparently impending calamity, His Highness' Government had adopted

measures for the inauguration of a system of relief works which, it was hoped, would afford the threatened Districts the means of tiding over the months of scarcity likely to intervene between the failure of the later crops, and the early harvest of the coming year. The system of relief which, it was decided to adopt, was the same as that which is prescribed for all British Provinces. There is, however, one point connected with the administration of relief, upon the importance of which His Highness' Government lay special stress. In their opinion, it is essential that a scheme of relief, in order to be efficient must provide, on an extensive scale, for works specially intended for the relief of the agricultural population in the vicinity of their villages. Our main object should be to prevent the dispersion of families in quest of distant works. Near every inhabited village, it will be easy to provide abundance of suitable work, such as the improvement of tanks, the making of wells and village-roads, the improvement of the existing local sanitary arrangements, the digging and weeding of fields, construction of Saguvali Kattes and other similar works. The employment of the people on such works will enable them to return to their homes at the end of each day's work, and thus it will be possible to preserve the mutually helpful bonds of village society. The early commencement of works of this kind is of paramount importance, for, it is only in that way, we can induce the people to resort to relief works at the outset. Experience shows that in the earlier stages of distress, they prefer to cling to their homes upon unwholesome or insufficient food rather than seek employment on distant works. It is only when even such food fails and when emaciation sets in, that they leave their homes in quest of work or food, and enter upon that career of aimless wandering which was so fruitful a source of suffering during the last Famine.

In organizing relief measures, therefore, my first endeavour was to arrange for a programme of works near the homes of the people. For some of the most affected parts of Tumkur and Chitaldroog, such a programme has already been mapped out on the principle of leaving no inhabited village without suitable work within a radius of 3 miles. It is in contemplation to complete the programme at an early date for the whole of the area likely to be affected by a succession of bad seasons.

In addition to these works intended chiefly for the agricultural population, and under the supervision of the Civil Officers, arrangements had also been made for undertaking, when required, a system of works under the professional control of the Public Works Department, and intended chiefly for persons who generally resort to such works for employment. The D. P. W. Relief Scheme, to meet which an additional grant of 2½ lakhs was provisionally made to that Department, comprised the restoration or repair of a large number of tanks and the formation of a few useful new roads, and improvement of existing ones, the works being so situated that the laboring and even the agricultural classes could reach them without losing touch of their village homes. These projects would, it must be admitted, be entirely insufficient to meet the demand for work that would arise in the event of wide-spread and intense distress, but it was never apprehended that we should have to cope with a famine at all approaching in severity that of 1876-78. For the amount

of distress anticipated, the works projected seemed sufficient. They would not entail profuse expenditure, and would prove remunerative, whilst affording for a limited period ample occupation to the landless classes and field-laborers. Should, indeed, a desolating famine again come on the land, it would be difficult to initiate D. P. W. relief works on a sufficiently large scale, without resorting to the immediate extension of our Railway lines, and starting the much discussed great Marikanave Reservoir and its subsidiary channels.

Prospects, however, have, as already stated, materially improved; abundant rains have recently fallen all over the Taluks which at one time were most sorely threatened; the tanks have partially filled, the withering crops have revived, and under Providence there is now every reason to hope that the need for exceptional measures of relief has, for the present, entirely ceased.

In congratulating the country on the narrow escape we have had, I must not omit to mention that in maturing my plans to meet the threatened calamity, it has been my good fortune to receive from Mr. Girdlestone, the British Resident, most valuable advice and support. The active interest he invariably evinced in the elaboration of relief measures has been a source of strength to me and of encouragement to my officers; and I take this opportunity to acknowledge thus publicly, on behalf of His Highness' Government, the cordial sympathy which they invariably received from him, during the anxious period the State has just passed through. My acknowledgments are also due to the District officers for their active watchfulness of the state of the country and for their preparedness for prompt action in case of need. I have also received valuable aid and co-operation from my Chief Secretary, Mr. Vijayindra Rao, in the organization of relief measures generally and from Major Bowen, the Public Works Secretary, in arranging, in the very short time at his disposal, an adequate programme of professional agency works.

Irrigation Works.—I must now touch on a subject as intimately connected with the averting of the dangers arising from abnormal seasons, as with the well-being of the Province in ordinary years. I mean our Irrigation Works. I shall first enumerate briefly what has been done to our tanks and channels in the years immediately preceding the great Famine, and what has been done since, and then I shall discuss the policy to be pursued in the near future.

In the years from 1871—72 to 1875—76 inclusive, the total outlay on Irrigation was Rs. 20,07,539, of which Rs. 11,32,464 was on original works,—that is, on the restoration of abandoned tanks, or on the radical improvement and extension of our channels; and Rs. 8,75,075 on repairs,—that is, on the maintenance of already existing works yielding revenue. This gives in round numbers an average of Rs. 4,00,000 on new and old works for each of the five years. Much useful work was done in the same direction during 1876—77, 1877—78 and 1878—79, which I shall call the famine years; but this expenditure was mostly abnormal, and its primary object was the alleviation of distress, and but partially, the benefit of the works themselves. So I shall pass those years by. From

1879—80 to 1884—85, both inclusive, the total outlay on irrigation was Rs. 18,56,668, or an average of over 3 lakhs for each of the six years. This average expenditure on works of vital importance, though exhibiting no neglect of irrigation, was below that of the first five years of the last decade; but you will remember that not only did the Rendition of the Province and the disastrous results of the Famine lead to the breaking up of the expensive establishments previously employed on the so-called serial restoration of tanks, but in the years succeeding, the greater part of the resources of the State were wisely diverted to the rapid completion of a part of our projected Railway system. The further development of that system will, as already stated, shortly pass out of our hands under very favorable conditions, and the sensible relief of financial pressure that will then be afforded will enable us, it is hoped, to give greater attention and more ample funds to the furtherance of irrigation.

Tank policy.—In my speech last year, I sketched the outlines of a scheme then under consideration for dealing with the maintenance of our tanks. The proposal I brought forward was to throw on the Public Works Department full responsibility for all tanks yielding a revenue of Rs. 500 and upwards. The onerous duties connected with the improvement and up-keep of these tanks were, it was thought, as much as the limited staff of the Public Works Department could well undertake. The up-keep of all tanks with a revenue less than Rs. 500 was to rest with the ryots themselves, under the control of the Revenue officers, whilst private capital and enterprize were to be enlisted in our service for the restoration, under favorable conditions, of old abandoned tanks. That scheme which is, it must be admitted, beset with many difficulties, has not yet been completely matured; and authorities on the subject differ as to the limit to be fixed in regard to the relative responsibilities of the Public Works Department and the ryots. The settlement of the question one way or the other is, however, one of the crying wants of the Province, and the Government have decided to test the feasibility of the five hundred rupee limit scheme by introducing it in the first instance into seven selected Taluks, one in each District. In these Taluks, the responsibilities of the Public Works staff will cease as regards tanks with a revenue less than Rs. 500, excepting in cases where the Revenue officers may find it necessary to call on the Engineers to construct masonry works, such as sluices, Kodis and aqueducts, which the ryots themselves cannot well undertake. And, as the ryots can hardly be compelled to build or repair the stone revetments of such tanks, works to which they are unaccustomed, funds will be placed at the disposal of the Deputy Commissioner for this purpose. It seems to me that this tentative measure will have the effect of putting to a crucial test the feasibility of the policy above indicated; and after the lapse of a reasonable period, the results of the trial now proposed will enable the Government finally to decide as to what limit and what system should be adopted in the future. I believe that, with the cordial co-operation of the Revenue and Public Works officers, the tentative scheme now to be adopted will be found to work so satisfactorily as to enable the Government to introduce it into the whole Province at no distant date.

Marikanave Reservoir.—The old project for a reservoir at Marikanave near Hiriyur is now being re-considered. The proposal was originally brought forward as a feasible scheme by Major Dobbs in 1855, and then examined by Colonel Green at the express desire of Sir Mark Cubbon. In 1869, Major Sankey's design was submitted to the Government of India, but, as it did not contain full estimates for irrigation channels, the papers were returned. Surveys were afterwards continued till 1873, when the project was abandoned for want of funds. The site offers great natural advantages for the formation of a reservoir of very considerable capacity, and it is the intention of the Durbar to resume the project and at an early date to complete the necessary enquiries and surveys, with detailed estimates as to cost of head works and irrigating channels. It is probable that the work will eventually yield a return of about 7 per cent on the capital of about 20 lakhs which may be required, and, as it will be the means of relieving the State of its constant anxiety regarding portions of Chitaldroog, no effort will be spared to push it to an early completion.

Collection and Scrutiny of Statistics.—The imminence of the famine this year has brought to notice some defects in the present machinery for the collection and scrutiny of statistics—agricultural, vital and economic. For a small Province like Mysore, it may perhaps not be necessary to have a separate Department of Agriculture, but it is absolutely necessary to have at the head-quarters an officer of standing and experience, who could "collect and deal with the statistical returns relating to the weather, the agriculture, the health and the well-being of the people, and thus secure the most prompt and accurate knowledge attainable of a probable failure of crops, and of the extent and consequences of any failure that actually takes place." In ordinary times, this work may not be sufficient for a separate officer. It is therefore in contemplation to combine the office of Director of Statistics with that of the Inspector General of Police and of Forests and Plantations.

Re-constitution of Chitaldroog and Hassan Districts.—The experience of the past three years has convinced the Maharaja's Government of the necessity of having a regular District in the place of the present Sub-Division in such a large and distant place as Chitaldroog. The tract, as you know, is one of the border Districts of the Mysore State, with a long line of frontier, wild and hilly in parts, and affording shelter to dacoits, and from its being constantly subject to drought, has always been a source of anxiety to Government. The re-constitution of this Sub-Division into a District with all the machinery necessary for an efficient Revenue and Police administration will go a great way towards promoting local responsibility and prevention of crime, and it will be an important step towards an efficient administration of famine relief.

At some future time, it may be advisable to consider whether Hassan also should not be restored to its former position, thus reducing to its original manageable size the Mysore District, which, at present, is rather unwieldy. But the question of the re-constitution of Hassan is not so pressing as that of Chitaldroog.

Re-constitution of certain abolished Taluks.—Experience has also convinced us of the

great public inconvenience caused by amalgamating some of the important frontier Taluks with the neighbouring ones, and this is especially the case with the Taluks of Malvalli, Arkalgud, Malur and Kankuppa, and perhaps of Devanhalli also. Ever since these Taluks were broken up, there have been complaints of the inconvenience, and, in some instances, of the positive hardship, resulting from the change. I have been unwilling to disturb the new arrangement without a fair trial. Later experience, however, makes it clear that, while the resultant saving is inappreciable, the breaking up of these Taluks has not promoted administrative efficiency, and has heen attended with great inconvenience to the ryots and village officials, and has had a prejudicial effect on local trade and local prosperity. His Highness' Government have therefore resolved to re-constitute at an early date some of the abolished Taluks.

Legislation.—In the Legislative Department the Local Boards' Regulation, which came under discussion in previous meetings of this Assembly, was submitted in April last to the Government of India for sanction.

The Draft Revenue Code as finally revised by the Mysore Government was, some short time back, published in the official Gazette, and it is now being submitted to the Government of India.

The important Forest Regulation is still under discussion. The subject is surrounded by many difficulties, and this will be readily understood when it is said that in Forest matters, even the British Legislature, with its great experience, has not yet arrived at a final decision. The Forest Code is under revision in Bombay, the existing arrangements being deemed very unsatisfactory in the interests of the ryots. In Mysore, the subject is at present receiving careful consideration, and I may here mention that the Government of His Highness the Maharaja will enforce, as a fundamental principle, that local wants, local customs, and local systems of tenure should not be disturbed. On the other hand, however, it must be distinctly understood that, as population and cultivation increase, it will be necessary for Government to interfere to prevent the wasteful destruction of forests and to ensure their conservation in the best interests of the people. It will be strongly impressed on the minds of Forest officers that their aim should be to conciliate the villagers in forest tracts, and secure their co-operation by liberal treatment in respect of their domestic wants.

In connection with Forest Legislation, I may add that it is proposed to place the Department under an Inspector General of Forests and Plantations. The Government are training three students in the Forest School at Dehra Dun for the post of Assistant Conservators, and it is proposed eventually to give an officer of this class to each District.

Though not strictly connected with the subject of Legislation, I may in this place mention that, at this moment, there is under consideration the introduction of an exhaustive Code of Rules based upon the Famine Code of the Madras Presidency and upon the provisional Famine Code of the Government of India. Such a Code will be a guide to

our administrative officers of all grades in the inauguration and execution of relief measures in times of distress.

Pasture.—The important subject of pasture reserves is also now engaging the attention of Government. In a country like Mysore, where cattle-breeding is carried on to a large extent by the Government as well as by private individuals, the subject of pasture land is of the utmost importance. For the Government cattle, valuable pasture land has been reserved, and for private cattle the Survey Department has allotted to each village free Gomal or pasture land, this allotment being supplemented yearly by the sale to the villagers of the right to graze on Government waste-land, which, in many places, is extensive. In ordinary seasons, the existing provision is understood to be sufficient. In years of scanty rain-fall, there is invariably a general cry against the insufficiency of the existing grazing provision, and all the District Officers and Amildars consulted affirm that the cry is not without reason. The deficiency is generally met by temporarily placing the Reserved Forests at the disposal of villagers for the purpose of grazing, an arrangement inadequate in itself and not considered as a rule a safe one, as there is always a risk of the privilege being abused. It is, under the circumstances, proposed to make a permanent provision that may, to some extent, meet the requirements of good and bad years, and to make the ryot independent, as much as possible, of Government Reserved Forests. It is admitted that the present Amrut Mahal allotment is far in excess of what is actually utilized by the Government cattle, and it is therefore proposed to reduce it to some extent. When this is done, some of the surplus Kavals would be utilized for fuel and pasture reserves, which could be thrown open to the public in exceptional years, while other surplus Kavāls could be placed at the disposal of the public on the moderate assessment of Hulgaval tenure, and on the distinct understanding of liability to enhanced assessment for lands brought under cultivation. The experiment of preserving green fodder in silos is being carried on on a large scale by the Military Secretary, who is in hopes of being able to report favorably upon it at an early date. The report, when received, will be published in the Gazette in English and Canarese.

Anche or Local Post.—A question of great importance which is now before the Government, relates to the Anche or the Local Post. It is undoubted that the Department is capable of much improvement. Two alternative proposals have been made to us by the Director General of the Post Office in India. The first proposal is that the complete control of Postal arrangements in Mysore should be surrendered by the Durbar to the Imperial Postal Department, that that Department should take over the whole of the Mysore Postal establishments, pay them from Imperial revenues, and treat Mysore in all postal matters exactly as if it were a British Province, the service correspondence of the State being carried at the cheap official postage rates prepaid by service stamps. The proposal is advantageous in many ways. It secures that centralization and uniformity of rules and organization, which is the essence of every efficient Postal system. It remedies that public inconvenience which naturally results from Mysore being isolated from the rest of India in Postal matters, and it saves the Maharaja's Government the trouble and cost of maintaining

a local Postal Department, which, at best, only imitates the Imperial system in a manner necessarily imperfect. It involves no interference, administrative or political, though the liability of the State in respect of Mail robberies will increase as the British Postal system expands.

The alternative proposal submitted for the consideration of the Maharaja's Government is—

1*st*—that Mysore should adopt all British rules and rates of postage, using British Postage Stamps over-printed "Mysore," which will be supplied to it for the mere cost of manufacture ;

2*ndly*—that all paid inland correspondence, official or non-official, transferred from Mysore to British Post Offices or *vice versa* be delivered free, each Post Office keeping whatever it collects in stamps or on bearing letters ;

and 3*rdly*—that Mysore introduces the Money order, Insurance, Value-payable parcel, Postal-note and other systems peculiar to the British Indian Post Office, retaining any fees it earns on account of them.

You will observe that this alternative proposal secures complete reciprocity in all Postal matters, but it must not be forgotten that its adoption throws a great responsibility upon the State, and is likely to involve some additional expenditure for the improvement of the present establishment. His Highness' Government have considered the subject with great care and in all its bearings, but, before coming to a final decision, they desire that it should be fully discussed at this Meeting.

Gentlemen, before concluding this address, let me assure you that it is a source of great satisfaction to His Highness the Maharaja that the opportunity afforded by this annual Assembly for the representation of public wants, and the suggestion of measures calculated to better the condition of the people, is prized as a valuable privilege by his subjects in all parts of the Province. At the outset, the institution was regarded by some as premature, but the continued interest you evince in public affairs, and the practical common sense which characterizes your discussions have served to refute the assumption so often made that the institution is in advance of the times. The success achieved in the past is an encouragement for further endeavours to secure at these annual meetings a fuller representation of the wants and wishes of the people. In view to attaining this end, His Highness has been pleased to direct that the various Local Boards, now about to be constituted, shall be empowered to select their representatives for this Assembly, thereby investing it with the authority and weight which belong to a body formally deputed for the representation of the people.
